1. Introduction

This handbook applies to students starting the following courses in Michaelmas term 2017:

Archaeology:
- Master of Studies (M.St.)
- Master of Philosophy (M. Phil.)

Classical Archaeology:
- Master of Studies (M.St.)
- Master of Philosophy (M. Phil.)

Archaeological Science:
- Master of Science (M.Sc.)
- Master of Studies (M.St.)

The information in this handbook may be different for students starting in other years. The Examination Regulations relating to this course are available at [www.admin.ox.ac.uk/examregs/](http://www.admin.ox.ac.uk/examregs/)

*If there is a conflict between information in this handbook and the Examination Regulations then you should ALWAYS follow the Examination Regulations.*

If you have any concerns please contact the Postgraduate Taught Course (PGT) Administrators, Dr Wendy A. Morrison or Lynda Smithson pgt-support@arch.ox.ac.uk

This is version 2.0 of the 2016-17 handbook. The information in this handbook is accurate as at 25 October 2016; however, it may be necessary for changes to be made in certain circumstances, as explained at [www.graduate.ox.ac.uk/coursechanges](http://www.graduate.ox.ac.uk/coursechanges). If such changes are made, the department will publish a new version of this handbook together with a list of the changes and students will be informed. The revised handbook will have a new version number.

These notes are designed to give guidance on the issues that are most likely to be relevant to graduate students on the postgraduate taught courses, to introduce in plain language and with clarity the procedures in which they may be involved, and to indicate
the standard and scope of the work required for the various degree programmes. **They are not intended to be a substitute for the University’s Examination Regulations**, which give the official regulations for each degree. All active editions of the Examination Regulations are available online at www.admin.ox.ac.uk/examregs/. In consulting them, remember to note both the **general regulations** affecting the degree course on which you are engaged, and also the **specific regulations** made by the Committee for the School of Archaeology.

The Examination Decrees are updated annually, but those for the year in which you begin a degree are the ones that normally apply throughout its course. The Postgraduate Taught Course Administrators within the School of Archaeology are available to help resolve difficulties and College Tutors for Graduates can assist with any more technical problems (for example concerning residence and fee requirements). These Guidance Notes are also revised annually: you will receive an electronic copy of the latest version before your arrival, but you can also find the most current version on the Archaeology web page www.arch.ox.ac.uk/current-graduates.html.

Always ask the Postgraduate Taught Course Administrators at pgt-support@arch.ox.ac.uk if you are in any doubt as to which regulations apply to you. There is further information for graduate students at http://www.arch.ox.ac.uk/current-graduates.html.

**The organisation of the University**

The organisation of Oxford University is complex and it may be helpful to outline some of the main institutions and their functions. Broadly speaking, the University is divided into divisions, faculties, sub-faculties and departments; the School of Archaeology may be seen as roughly the equivalent of a department within the Division of Social Sciences.

The colleges are independent, self-governing institutions, although they are part of the University in its widest sense. Most academic staff members belong both to a division and faculty as well as to a college. By and large, divisions and faculties deal with lectures, examinations, and administration of graduate work, while colleges deal with
undergraduate admissions and tutorial work and with the provision of various ‘domestic’ facilities. The admission of graduates is dealt with mainly by the divisions and faculties, but all graduates must also be admitted by a college. A student’s college is treated as his/her official address for all university correspondence, so it is important to check your mailbox in college regularly, and to inform your college if you are away from Oxford. Your college will also assign you an email address, to which important university communications will be sent (see below).

The terms at Oxford are traditionally known as Michaelmas, Hilary, and Trinity terms (often abbreviated as MT, HT and TT). Term time normally means the eight weeks of Full Term, during which lectures and tutorials take place, although each Full Term is set within a longer period which is technically still ‘term’. The dates of the Full Terms for the current year appear on the title page. Regular university events, such as meetings, examinations, or submission deadlines, normally recur on a stated day of a stated week of each Full Term, or on a stated day of a stated week in a particular Full Term, so that you will frequently hear, and read below, of things happening in Fourth (4th) Week, etc. By extension, the week before the start of Full Term is known as Noughth (0th) Week and the week after Ninth (9th) Week.

On arrival

Your supervisor should have written to you beforehand, and you should contact him or her to arrange for a meeting as soon as you can in Michaelmas term Noughth (0th) Week (the week prior to the scheduled start of term) for general orientation and to discuss details of your course. It is desirable that decisions about your programme of work should be taken before First (1st) Week of term begins. However, due to the way the tutorial system works, you may have selected course options which are not taught by your supervisor, and thus it is very important that sometime before courses commence in First Week that you have also been in communication with the Convenor of the options you wish to take. The names of the convenors are listed on the website: Archaeology, and Classical Archaeology Periods and Subjects. If your supervisor is not available, you should contact the PGT Course Administrators (pgt-support@arch.ox.ac.uk).
Induction

You should arrive in time for Graduate Induction on the Monday of the week immediately before the start of Michaelmas Term (0\textsuperscript{th} week). This will include introductions to the main working facilities, such as the Institute of Archaeology, the Research Laboratory for Archaeology and the History of Art (RLAHA), and the major libraries, as well as social gatherings. Classical archaeologists are also invited to introductory sessions organised by the Ancient History Sub-faculty of the Classics Faculty, which gives them the opportunity to meet other classicists. Details of exact dates, times, and venues will be forwarded to you separately, but you must plan to be settled in Oxford ready to commence Induction on 0\textsuperscript{th} week Monday. Colleges also have their own induction programmes, so this can be a busy week.

Libraries

Your supervisor will advise you about getting admitted as a reader in the relevant major libraries. Entrance to the main libraries, and to various other University facilities, is based on your University ID card; this is sometimes referred to as a ‘Bod Card’, short for Bodleian Libraries. This card is normally issued by your College, and the card must subsequently be registered with the relevant libraries to which you wish to gain access. All archaeology students should register as readers at the Sackler Library (St John’s Street), and those working in prehistory should also be readers at the Balfour Library (Pitt Rivers Museum). The Bodleian Library is generally less useful to archaeologists, but you may well find that some book are only available in the Gladstone Link of the Bodleian and certainly for more science-based material, some journals are only available in the Radcliffe Science Library (RSL), which is also part of the Bodleian; it may save time to become a reader from the start. There is also a small reference library (no borrowing allowed) for European and Roman Archaeology on the first floor of the Institute of Archaeology, open to all.

Lectures

As a member of the University, you are entitled to attend any university lecture or class, in any subject, provided it is not advertised as restricted to a specific group of
candidates for special papers. You may be expected by your supervisors and tutors to attend some of the undergraduate lectures in relevant subjects. You may also wish to widen your expertise in non-archaeological subjects in this way. Lecture lists covering archaeological subjects are those for Archaeology & Anthropology, Classical Archaeology & Ancient History, and Classics, all with some overlap. Lecture lists can be found online at www.ox.ac.uk/students/academic/lectures/ for many subjects across the University and for Archaeology in specific at www.arch.ox.ac.uk/lecture-list.html; lectures for Classics can be found on their website at rbll.classics.ox.ac.uk/. For further details on lectures and seminars, see Section 25.b below.

E-mail

Your college will issue you with an e-mail address (givenname.familyname@college.ox.ac.uk), and this is the default means of communication with supervisors, tutors, and the PGT administration team. You are therefore expected to check this regularly, preferably on at least a daily basis, since urgent communications may be sent by this means, and will be assumed to have reached you. You should notify this email address to Dr Claire Perriton (claire.perriton@arch.ox.ac.uk) at the Institute of Archaeology, 36 Beaumont Street, and an @arch address can be attached to the same account. Do not rely on your personal @hotmail or @gmail.com (or similar) email address, since a number of people who need to communicate with you urgently may not know it.

2. The Graduate Studies Committee

The School of Archaeology is responsible for the organisation and teaching of most archaeology within the University, but it delegates responsibility for all graduate matters to its Graduate Studies Committee, which reports to it regularly. The Graduate Studies Committee (or GSC for short) therefore deals with the admission of graduate students, applications for transfers of status, approval of thesis and dissertation titles, appointment of supervisors and examiners, and other matters involving graduate students that arise from time to time or are referred to it by other university bodies.

The GSC meets on Tuesday of the second and eighth week of each term, and its agenda and papers are sent out about a week in advance. Any matter you believe needs to be raised with the GSC should be brought to the attention of PGT
administration at least one week prior to a GSC meeting, if it is to be discussed at that meeting.

The Chair of the GSC is the Director of Graduate Studies, currently Dr Irene Lemos (Irene.lemos@arch.ox.ac.uk). The GSC includes one member (normally the President) of the Committee of Graduate Archaeology at Oxford (GAO), the body that represents all Archaeology graduate students. Graduate members of the GSC attend for all unreserved business matters and may also raise matters of their own at GSC meetings. The current President of the GAO is Rebecca O’Sullivan.

All forms relating to issues to be raised at GSC can be found available for download at: www.ox.ac.uk/students/academic/guidance/graduate/progression.

The following six sections give a brief account of the various taught courses; the full regulations can be found in the Examination Decrees and Regulations, and, as stated above, those for the year in which you start a degree continue to apply to you throughout that degree.

The M.St. and M.Sc. are one-year taught courses; the M.Phil. has a taught first year course similar to the M.St. and a second year mainly devoted to the preparation of a 25,000 word thesis.

FHEQ level 7
Length of Course – 9 months

---

1 If this information conflicts in any way with that contained in Exam Regulations, the correct information is always that given in [Exam Regulations](#).
The M.St. in Classical Archaeology offers candidates a wide range of periods (from Prehistoric Aegean to Byzantine), and of subjects, in two lists: three must be chosen for written examination. Candidates may also be granted permission to study appropriate topics in Classical Archaeology, or directly related to it, which are not on the lists, provided teaching is available. Those who are seeking a broader course may, if they wish, select as one of their three choices any suitable subject offered in any of the following M.St. courses subject to availability: Archaeology, Archaeological Science, Byzantine Studies, Classical Literature, Greek and Roman History, History of Art, Women’s Studies.

Course aims, intended learning outcomes, and other course details are available for download at http://www.arch.ox.ac.uk/graduate-provision.html

**General summary**

The M.St. course and the first year of the corresponding M.Phil. are identical in content, and the same examination is taken by all candidates at the end of the year with only slight variation in certain choices concerning options and examination format (see section on M.Phil. and the Examination Regulations). You will have to enter for the examination relating to the degree for which you were registered, but because of the similarity of the courses a transfer from one to the other, influenced perhaps by examination results, or by changes in career plans or available funding, may be possible.

Lists of available options are available at www.arch.ox.ac.uk/graduate-classical-archaeology.html and are included in the Examination Regulations. Please note that not all the courses listed may be available every year, and it would be best to contact your supervisor with your first and second choices for each term as soon as possible, so that you can discuss viability.

M.St. candidates must choose three options including one period topic. Lists of specific and related options are provided for each degree, but candidates may, if they wish, choose one of their three options from the list for the M.St. in Archaeology or from the M.Sc. in Archaeological Science. They may also apply to study a subject not listed; this will normally be allowed, provided that the proposed subject is appropriate and that suitable teaching can be delivered. Students can therefore shape for themselves a broader or a more specialised Master's course in Classical Archaeology, according
to personal preference and career plans.

For the examination, one of your three options must be chosen from ‘Schedule A’ (see Examination Regulations); this option is normally taught in the third term. This option will be examined by a traditional unseen written paper, in which you are asked to choose three questions from a selection and to answer them all within three hours. You will be also be required to submit a pair of 5,000 word essays for one of your remaining two options, and a 10,000 word dissertation for the other.

The Examination Regulations contain details (summarised in the table above) of how and when a candidate’s choices must be notified, and when the various pieces of work must be submitted. In general, candidates, in close consultation with their supervisors, should make all choices of option and examination format as early as possible in Michaelmas Term so that they can begin work accordingly. The candidate, in consultation with the supervisor/option co-ordinator as relevant, will devise the pre-set essay titles and dissertation title. The proposed options need to be submitted for formal approval by the School of Archaeology, via its Graduate Studies Committee, by noon of Friday of the 7th week of Michaelmas Term. The deadlines for submission of pre-set essay titles are given in the above table.

*There will also be a compulsory viva voce examination for all candidates.*

Submit your thesis – submission guidance is available at the University website

You must remain available in Oxford until the end of 9th week, as you may be called to viva voce

Summary of course content

Length of Course – 1 year and 9 months

FHEQ level 7

The two-year M.Phil. in Classical Archaeology has as its first year the same course and same examination as the M.St. in Classical Archaeology: Candidates must pass this examination at a satisfactory level to qualify for the second year of the M.Phil. In the second year, they are required to submit a thesis of up to 25,000 words on an approved topic, and to take a written examination on one further subject, chosen from those listed for the M.St. in Classical Archaeology. An appropriate subject that is not listed may be approved instead, provided that teaching is available.

Course aims, intended learning outcomes, and other course details are available for download at http://www.arch.ox.ac.uk/graduate-provision.html

General summary

The M.St. and the first year of the corresponding M.Phil. are identical in content, and the same examination is taken by all candidates at the end of the year with only slight
variation in certain choices concerning options and examination format (see section on M.St, and the Examination Regulations). You will have to enter for the examination relating to the degree for which you were registered, but because of the similarity of the courses a transfer from one to the other, influenced perhaps by examination results, or by changes in career plans or available funding, may be possible.

Lists of available option are available at http://www.arch.ox.ac.uk/graduate-classical-archaeology.html and are included in the Examination Regulations. Please note that not all the courses listed may be available every year.

In the first year, candidates must choose three options, including one period topic. Lists of specific and related options are provided for each degree, but candidates may, if they wish, choose one of their three options from the list for the M.St. in Archaeology or from the M.Sc. in Archaeological Science. They may also apply to study a subject which is not listed, which will normally be allowed, provided that the proposed subject is appropriate and that suitable teaching can be delivered. Students can therefore shape for themselves a broader or a more specialised Master’s course in Classical Archaeology, according to personal preference and career plans.

During the second year, candidates work on one further subject from the lists provided, but most of the time is devoted to the preparation of a thesis of up to 25,000 words on an approved topic which you will develop in discussions with your supervisor. Further guidance on choosing your options should be sought from your supervisor if necessary, but generally speaking, as you will be researching and writing a substantial thesis on a specific area in your second year, options which provide broader study for the whole of the first year will normally be more useful to you.

For the first year examination, one of your three options must be chosen from ‘Schedule A’ (see Examination Regulations); this option is normally taught in the third term. This option will be examined by a traditional unseen written paper, in which you are asked to choose three questions from a selection and to answer them all within three hours. You will be also be required to submit a pair of 5,000 word pre-set essays for each of your remaining two options (i.e., four essays in total).
The Examination Regulations contain details (summarised in the above tables for first and second years) of how and when a candidate’s choices must be notified, and when the various pieces of work must be submitted. In general, candidates, in close consultation with their supervisors, should make all choices of option and examination format as early as possible in Michaelmas Term so that they can begin work accordingly. The candidate, in consultation with the supervisor/option co-ordinator as relevant, will devise the pre-set essay titles and the thesis title. The proposed options need to be submitted for formal approval by the School of Archaeology, via its Graduate Studies Committee, by noon of Friday of the 7th week of Michaelmas Term.

In the second year of the M.Phil., examination of the selected option is again by a pair of 5,000-word pre-set essays, but the main element of the examination is the 25,000-word thesis.

There will also be a compulsory viva voce examination for all candidates.

end of the year – a full list of options is available on the website. Candidates may also be granted permission to study appropriate subjects not on the list, provided teaching is available, while those seeking a broader course may, if they wish, make one of their three choices from the subject lists provided for the M.St. courses in Classical Archaeology or Archaeological Science.

Course aims, intended learning outcomes, and other course details are available for download at [http://www.arch.ox.ac.uk/graduate-provision.html](http://www.arch.ox.ac.uk/graduate-provision.html)

**General summary**

The M.St. course and the first year of the corresponding M.Phil. are exactly identical in content, and the same examination format is taken by all candidates (see section on M.Phil. and the Examination Regulations). You will have to enter for the examination relating to the degree for which you were registered, but because of the similarity of the courses a transfer from one to the other, influenced perhaps by examination results, or by changes in career plans or available funding, may be possible.

Lists of available options can be found online at [http://www.arch.ox.ac.uk/graduate-archaeology.html](http://www.arch.ox.ac.uk/graduate-archaeology.html) and are included in the Examination Regulations. Please note that not all the courses listed may be available every year, and it would be best to contact your supervisor with your first and second choices for each term as soon as possible, so that you can discuss viability.

M.St. candidates must choose three options. Lists of specific and related options are provided for each stream, but candidates may, if they wish, choose one of their three options from the list for the M.St. in Classical Archaeology or from the M.Sc. in Archaeological Science. They may also apply to study a subject not listed; this will normally be allowed, provided that the proposed subject is appropriate and that suitable teaching can be delivered. Students can therefore shape for themselves a broader or a more specialised Master's course in Archaeology, according to personal preference and career plans. Further guidance on choosing your options should be sought from your supervisor if necessary.
For the examination, one of your three options must be chosen from ‘List A’ (see Examination Regulations); this option is normally taught in the first term. This option will be examined by a traditional unseen written paper, in which you are asked to choose three questions from a selection and to answer them all within three hours. You will be also be required to submit a pair of 5,000 word essays for one of your remaining two options, and a 10,000 word dissertation for the other.

The Examination Regulations contain details (summarised in the above table) of how and when a candidate’s choices must be notified, and when the various pieces of work must be submitted. In general, candidates, in close consultation with their supervisors, should make all choices of option and examination format as early as possible in Michaelmas Term so that they can begin work accordingly. The candidate, in consultation with the supervisor/option co-ordinator as relevant, will devise the pre-set essay titles and dissertation title. The proposed options need to be submitted for formal approval by the School of Archaeology, via its Graduate Studies Committee, by noon of Friday of the 7th week of Michaelmas Term. The deadlines for submission of pre-set essay titles are given in the above table.

*There may also be a viva voce examination.*

| **Friday 6th Week – Before 12.00 noon** |
| Submit your thesis – [submission guidance](#) is available at the University website |

**You must remain available in Oxford until the end of 9th week, as you may be called to viva voce**

**Summary of course content**
Length of Course – 1 year and 9 months
FHEQ level 7

The two-year M.Phil. in Archaeology has as its first year the same course and same examination as the M.St. in Archaeology. Candidates must pass this examination at a satisfactory level to qualify for the second year of the M.Phil. In the second year, they are required to submit a thesis of up to 25,000 words on an approved topic, and to produce a pair of 5,000 word essays on one further subject, chosen from those listed for the M.St. in Archaeology. An appropriate subject that is not listed may be approved instead, at a candidate’s request, provided teaching is available.

Course aims, intended learning outcomes, and other course details are available for download at [http://www.arch.ox.ac.uk/graduate-provision.html](http://www.arch.ox.ac.uk/graduate-provision.html)

**General summary**
The M.St. course and the first year of the corresponding M.Phil. are exactly identical in content, and the same examination format is taken by all candidates at the end of the year (see [section on M.St.](#) and the [Examination Regulations](#)). You will have to enter for the examination relating to the degree for which you were registered, but because of the similarity of the courses a transfer from one to the other, influenced
perhaps by examination results, or by changes in career plans or available funding, may be possible.

Lists of available options can be found online at http://www.arch.ox.ac.uk/graduate-archaeology.html and are included in the Examination Regulations. Please note that not all the courses listed may be available every year, and it would be best to contact your supervisor with your first and second choices for each term as soon as possible, so that you can discuss viability.

In the first year, candidates must choose three options including one core paper (List A). Lists of specific and related options are provided for each stream, but candidates may, if they wish, choose one of their three options from the list for the M.St. in Classical Archaeology or from the M.Sc. in Archaeological Science. They may also apply to study a subject which is not listed, which will normally be allowed, provided that the proposed subject is appropriate and that suitable teaching can be provided. Students can therefore shape for themselves a broader or a more specialised Master's course in Archaeology, according to personal preference and career plans.

During the second year, candidates work on one further subject from the lists provided, but most of the time is devoted to the preparation of a thesis of up to 25,000 words on an approved topic which you will develop in discussions with your supervisor. Further guidance on choosing your options should be sought from your supervisor if necessary, but generally speaking, as you will be researching and writing a substantial thesis on a specific area in your second year, options which provide broader study for the whole of the first year will normally be more useful to you.

For the examination, one of your three options must be chosen from ‘List A’ (see Examination Regulations); this option is normally taught in the first term. This option will be examined by a traditional unseen written paper, in which you are asked to choose three questions from a selection and to answer them all within three hours. You will be also be required to submit a pair of 5,000 word essays for one of your remaining two options, and a 10,000 word dissertation for the other.
The Examination Regulations contain details (summarised in the above tables for first and second years) of how and when a candidate’s choices must be notified, and when the various pieces of work must be submitted. In general, candidates, in close consultation with their supervisors, should make all choices of option and examination format as early as possible in Michaelmas Term so that they can begin work accordingly. The candidate, in consultation with the supervisor/option co-ordinator as relevant, will devise the pre-set essay titles and thesis title. The proposed options need to be submitted for formal approval by the School of Archaeology, via its Graduate Studies Committee, by noon of Friday of the 7th week of Michaelmas Term.

In the second year of the M.Phil., examination of the selected option is again by a pair of 5,000-word pre-set essays, although is the option is from List A, you may choose to sit a three-hour written exam instead; if the option is from Classical Archaeology Schedule A, you will only be allowed to sit a three-hour written exam. The main element of the second year examination is the 25,000-word thesis.

*There may also be a viva voce examination.*

**Candidates may be called to viva voce after submission of the dissertation, as required by the examiners. This may be on the candidate’s written papers, their dissertation, or both.**

**Summary of course content**

Length of Course – 12 months

FHEQ level 7

_The course provides broad introductory training both for those with a first degree in archaeology who wish to undertake research of a scientific nature, and also to those previously trained in the sciences who wish to learn something of specifically archaeological problems, before applying their knowledge at a research level. The_
course can be taken either for its own sake, or as preliminary training for doctoral research.

Course aims, intended learning outcomes, and other course details are available for download at [http://www.arch.ox.ac.uk/graduate-provision.html](http://www.arch.ox.ac.uk/graduate-provision.html)

**General summary**

The MSc course is comprised of three modules: *Principles and practice of scientific dating*, *Bio-archaeology*, and *Materials analysis and the study of technological change*. These may be colloquially referred to as Chronology, BioArch, and Materials, respectively. Formal instruction for these modules occurs during the first two terms. M.Sc. candidates generally take all three modules, but you may, if you wish, choose to replace ONE of these with an option from the M.St. in Archaeology (List A or B) or the M.St. in Classical Archaeology (Schedule B only). Further guidance on choosing such a substitution should be sought from your supervisor at the earliest opportunity.

For the examination, each of the three modules will be examined by a traditional unseen written paper, in which you are asked to choose three questions from a selection and to answer them all within two hours (i.e., three two-hour exams). You will also be required to submit one pre-set essay of 10,000 words on a topic pre-arranged with your supervisor. If you had substituted an Archaeology or Classical Archaeology option for one of the modules, you would only sit a written exam for the two main modules in which you had participated; your third non-science option would be examined by a pair of 5,000 word pre-set essays, and you would submit a further 5,000 word pre-set essay on a topic pre-arranged with your supervisor.

After these examinations are complete (see above figure for submission and exam dates), candidates write a dissertation of no more than 20,000 words on a research area or topic, selected in consultation with your supervisor and approved by the Chair of Examiners for Archaeological Science; this must be submitted by noon on Friday four weeks and two days before the start of the following Michaelmas Term.

The final marks received on the course are broken down as follows:

- Where all three main modules are taken, each written exam carries 15% of the mark, the 10,000 word essay 15%, and the dissertation 40%.
Notes for Guidance – Postgraduate Taught Courses Only - -2016/17

- Where another option is taken in lieu of a main module, each written exam carries 15% of the mark, the numerical average of the two pre-set essays for the third option carries 20%, the 5,000 word pre-set essay carries 10%, and the dissertation 40%.

There may also be a viva voce examination after the submission of the dissertation; this may be to discuss your written papers, your dissertation, or both.

6 If this information conflicts in any way with that contained in Exam Regulations, the correct information is always that given in Exam Regulations.
Summary of course content
Length of Course – 9 months
FHEQ level 7
The course provides broad introductory training both for those with a first degree in archaeology who wish to undertake research of a scientific nature, and also to those previously trained in the sciences who wish to learn something of specifically archaeological problems, before applying their knowledge at a research level. The course can be taken either for its own sake, or as preliminary training for doctoral research.

General summary
The MSt. course is comprised of three modules: Principles and practice of scientific dating, Bio-archaeology, and Materials analysis and the study of technological change. These may be colloquially referred to as Chronology, BioArch, and Materials, respectively. Formal instruction for these modules occurs during the first two terms. M.St. candidates generally take all three modules, but you may, if you wish, choose to replace ONE of these with an option from the M.St. in Archaeology (List A or B) or the M.St. in Classical Archaeology (Schedule B only). Further guidance on choosing such a substitution should be sought from your supervisor at the earliest opportunity.

For the examination, each of the three modules will be examined by a traditional unseen written paper, in which you are asked to choose three questions from a selection and to answer them all within two hours (i.e., three two-hour exams). You will also be required to submit one pre-set essay of 10,000 words on a topic pre-arranged with your supervisor. If you had substituted an Archaeology or Classical Archaeology option for one of the modules, you would only sit a written exam for the two main modules in which you had participated; your third non-science option would be examined by a pair of 5,000 word pre-set essays, and you would submit a further 5,000 word pre-set essay on a topic pre-arranged with your supervisor.

In addition to these requirements (see above Table for submission and exam dates), you will write a 5,000-word report on a practical project selected in consultation with your supervisor and approved by the Chair of Examiners for Archaeological Science; this must be submitted by noon on Friday of the ninth week of the same Trinity Term in which you sat your exams (See above table)
The final marks received on the course are broken down as follows:

- Where all three main modules are taken, each written exam carries 20% of the mark, the 10,000 word essay 20%, and the practical report 20%.
- Where another option is taken in lieu of a main module, each written exam carries 20% of the mark, the numerical average of the two pre-set essays for the third option carries 30%, the 5,000 word pre-set essay carries 10%, and the dissertation 20%.

*There may also be a viva voce examination after the submission of the dissertation.*

9. Notification of options

Please note that notifications of essay titles, dissertation titles and options should be made to the relevant Chair of Examiners NOT the Director of Graduate Studies. Questions about the dates of examinations, including viva voce examinations, should also be directed to the relevant Chair of Examiners, as follows:

Classical Archaeology: Prof. I. Lemos  irene.lemos@classics.ox.ac.uk
Archaeology: Dr M. Charles  michael.charles@arch.ox.ac.uk
Archaeological Science: Dr Victoria Smith  Victoria.smith@rlaha.ox.ac.uk

You should pay particular attention to the deadlines by which you must submit your choices of options, dissertation titles and mode of examination, for approval by the GSC. Your supervisor’s approval of all these choices is required before they are submitted to the GSC, on forms for notification obtainable from the Graduate Studies Administrator. Pre-set essay titles should be sent by the relevant date directly to the Chairman of Examiners for the degree in which you are entered. Forms will be sent to you by the Academic Secretary (Lynda Smithson) and should be countersigned by the co-ordinator of the relevant option. The dates for all these notifications are given in the degree specific tables above. The timetable must be adhered to. Once the GSC has approved candidates’ options, the GSC must notify the Registrar almost immediately; *missing the deadlines may lead to penalties such as late entry fees.*
10. Teaching and supervision

Every student has a supervisor appointed by the GSC before the student’s arrival in Oxford. In choosing a supervisor, the GSC will naturally try to choose someone whose interests and expertise match those of the student, but if in the light of further knowledge a change seems appropriate, this is usually possible. Students will recognise that there are University limits on the numbers of graduate students an individual may supervise, and so it may not always be possible to have their first choice of supervisor. In selecting a supervisor the Committee will normally ensure that they are an appropriately qualified member of the academic staff of the School of Archaeology. In rare instances it may be appropriate for supervision to be provided by someone who does not hold such a post, for example where specialist input is required from an individual employed at another academic institution. In such cases, an academic member of the School of Archaeology will be appointed by the GSC to act as a co-supervisor.

Supervisors are responsible for guiding all aspects of a student's studies (and may also be a useful source of advice on other matters). Amongst other things, they will advise on choosing options, the availability of useful lectures or language courses, thesis or dissertation topics, and the best way in which to prepare this. Students will normally see either their supervisor or another staff member for weekly or fortnightly tutorials during term time (depending on which options are taken).

Teaching is in the form of lectures (where numbers permit), tutorials, classes, and seminars. For the M.St. and M.Sc. in Archaeological Science, strong emphasis is placed on practical work in the lab. For the other taught graduate degrees, tutorials and small classes, usually involving one to four or five students and a staff member, are the main means of teaching. This is because there are many subjects for which there are no specific lecture courses – most obviously, where an option has been specially arranged for a particular student. The tutorials are usually based on discussion of an essay written by the student during the preceding week, after reading suggested by the supervisor or option co-ordinator. Since the examinations are largely essay-based, it is important that students, particularly those from different academic backgrounds, should be aware of expectations in essay-writing, and should have sufficient practice to meet them. But there is a good deal of flexibility in the way in which tutorials may be arranged, and also in the precise topics dealt with.

While the supervisor or option coordinator (as relevant) will make sure that topics do not stretch too widely in tangent, students are expected to suggest topics or areas of particular interest. With only a maximum of 24 tutorials available during the year it is clearly not possible
to cover every aspect of every option in this way, and students are expected to do a good deal of additional and self-directed reading. Supervisors and option co-ordinators should be able to provide bibliographical help in such areas. While the range of choice of format in the examinations means that complete coverage of a broadly specified subject is not vital, students are urged to study their chosen topics as widely as time allows. Oxford offers superb opportunities in this regard, which students may not experience again; the most should be made of it.

The supervisor reports to the University termly on the progress of a graduate’s work: this report is viewed by the Director of Graduate Studies and the student’s college. This takes place electronically (see Annexe B for more detailed notes on the Graduate Supervision System). Graduates will be alerted by email to the opening of the reporting cycle each term, and are expected to submit reports of their own progress before the supervisor reports are completed. For further comments on supervisors and supervision, see Section 19 and Annexe B.

Oxford Full Terms are notoriously short, but graduate students must expect to spend a considerable proportion of the vacations studying, and in many cases, most obviously for the M.Sc. dissertation in Archaeological Science, that may mean staying in Oxford. Vacation time is also required for the production of pre-set essays. Supervisors can usually be consulted during vacations, if they are in Oxford. They may themselves, however, be away from Oxford at conferences or on fieldwork.

11. Pre-set essays

You will develop pre-set essay titles in consultation with the relevant option co-ordinator. The essays should require the presentation of an argument, not merely description or setting out the present state of knowledge. They should be sufficiently narrowly defined to allow close study of the primary evidence for the topic and its secondary literature, as well as critical discussion of both and since the word count includes any catalogue or similar evidence, subjects requiring them are not suitable.

The two essays should be chosen to cover different aspects/periods of the subject being studied. Their titles, approved by the supervisor or course co-ordinator, must be notified to the relevant Chair of Examiners by the date given in the relevant table above. Once notified, titles can only be changed with the permission of the Graduate Studies Committee.

Your supervisor/option co-ordinator will provide some bibliographic references on your chosen topic, and comment on a first draft of the essay, indicating further reading if necessary. But the supervisor should not approve the final version, which is after all a test of the candidate
not the supervisor. Non-native English speakers will no doubt be helped with written English by their supervisors/option co-ordinators. They may also have the English checked (but not re-written) by a fellow student. Any such help should be acknowledged at the end of the essay. No other assistance is allowed, and plagiarism (unacknowledged use of other people’s work, published or unpublished) is liable to lead to immediate failure in the degree.

Students are encouraged, where appropriate, to make use of tables and figures in their essays (and certainly in their dissertations), as these can be a very efficient way of conveying information, as well as providing good practice for future academic work. Tables and figures should be numbered and referred to in the text. When taken from published works, they should be cited as one would for direct quotations.

Essays should be printed in double spacing on one side of the paper. In general, the format should be kept simple. The use of section-headings within an essay is recommended a good way of structuring material and arguments, but further sub-headings generally are better avoided. Essays will be judged mainly on their clarity and content, but the presentation should follow good academic practice (see Section 20.c). Notes or text references are expected, and a bibliography listing the main works consulted is essential. Illustrations should be limited to those essential for clarity, and should be referred to at the appropriate points in the text. A maximum of 15–20 is suggested for each essay, and good photocopies/scanned images are sufficient. For the expected presentation of references and illustrations, see Subsection (i) below.

Each essay should be accompanied by a signed statement of the number of words in the text and notes (but excluding the Bibliography), and a declaration (Annexe H) that it is the candidate’s own work. Essays will be penalised by up to 1 mark for every 2% (or part thereof) by which they exceed the specified word limit.

Word Limits for pre-set essays (5,000 words):

- Text, footnotes, catalogues and gazetteers are included in the word count.
- Bibliography and captions are excluded from the word count.

Binding should be simple but strong enough to hold the pages properly together while they are read. Spiral or comb bindings are ideal, but three or four staples along the spine are sufficient, provided that they are long enough to hold all the pages and that the left hand margin is wide enough to allow the text to be easily read.
There should be a simple cover, showing the degree and subject for which the essay is submitted, the title as approved, and the candidate’s examination number; the word count should also be given. It must not show the candidate’s name, college, or supervisor’s name.

Pre-set essays must be submitted to the Clerk of the Examination Schools by noon on the day specified (see tables relevant to degree). Two copies of each essay are required; they will not be returned, so you may wish to keep an additional copy for yourself. Since they constitute part of the degree examination, submission dates must be strictly adhered to. For the penalties involved see Annexe E below.

You are requested to provide an electronic copy of any of your written assessed work, to pgt-support@arch.ox.ac.uk; the version you submit electronically must be identical to the version you printed out for hard-copy submission.

12. Dissertations, theses and reports

Dissertation, report, and theses titles must be submitted on time according to the relevant degree timetable (see specific degree sections above). For the M.Phil. second-year thesis, you do not need to notify the title formally until your first Trinity Term, but you should nevertheless decide on its subject area, at least by the end of Michaelmas Term of your first year, so that if the thesis research requires travel during the Long Vacation, you can plan it in time to apply for grants (see Section 22). Useful advice on the choice of thesis topic is given in Section 20.b; the subject for an M.Phil. thesis, and even more for an M.St. dissertation, must be much narrower than would be the case for a doctoral one, to allow for the much shorter time available. Those considering the possibility of subsequent D.Phil. research should make sure that the subject chosen for the M.Phil. thesis allows expansion or adaptation to the larger scale and more demanding standard which doctoral research would require. Discussion with the supervisor is essential from the earliest stage.

There is useful information about thesis presentation in general in Section 20 below. The final stages of preparation always take longer than expected, so do not leave seemingly minor matters such as the checking of references to the last minute. Remember, however, that although a clear and functional presentation is required, the thesis is primarily judged on its content, not its appearance. No amount of flashy illustration can compensate for a weak argument.

The copies of an M.St., M.Sc. dissertation or M.Phil. thesis submitted for examination can be quite simply bound, provided that the pages are properly held together while the examiners
read and re-read them. There should be a simple cover, showing the degree and subject for which the thesis, dissertation or report is submitted, the title as approved, and the candidate’s examination number; the word count should also be given. It must NOT show the candidate’s name, college, or supervisor’s name. The word limits specified for dissertations, theses and reports cover text and notes, but exclude the bibliography and for theses and dissertations, any descriptive catalogue. Theses and dissertations should be accompanied by a signed statement of the number of words in the text and notes (but excluding the bibliography), and a declaration (Annexe H) that it is the candidate’s own work. Theses or dissertations will be penalised by up to 1 mark for every 2% (or part thereof) by which they exceed the specified word limit. Please note that all references and footnotes should be included in the word count.

Word Limits for dissertations (10,000 words) and theses (25,000):

- Text, notes and appendices are included in the word count.
- Bibliography, captions and descriptive catalogues are excluded from the word count.

Three copies of the dissertation for the M.Sc. Archaeological Science, or two copies of any other dissertation, thesis or report must be delivered to the Clerk of the Examination Schools (High Street) by noon on the day specified (see relevant degree section above). Since dissertations, theses and reports, like pre-set essays, constitute part of the degree examination, submission dates must be strictly adhered to. For the penalties involved see Annexe E. After the examination, one copy of each dissertation, thesis or report will be retained by the University for at least 12 months for administrative purposes. For all M.St. theses, and unsuccessful M.Phil. and M.Sc. theses this retained copy is deposited with the written papers in the Examination Schools, and eventually destroyed. The retained copy of a successful M.Phil. or M.Sc. thesis, however, is permanently deposited (after any minor corrections specified by the examiners) in the Sackler or Balfour Library, or in the RLAHA, as appropriate.

The deposited copy of a successful M.Phil. or M.Sc. thesis must be permanently bound, and the candidate’s name and college should be added, e.g. by means of an adhesive label. The second copy of a dissertation, thesis, or report is normally returned to the candidate after the examination, but you are advised to print and retain a third copy for your own immediate reference, particularly in case you are called to a viva.

You are requested to provide an electronic copy of any of your written assessed work, to pgt-support@arch.ox.ac.uk; the version you submit electronically must be identical to the version you printed out for hard-copy submission.
13. Examinations

Students for the M.St., M.Sc. and M.Phil. should make sure that their names are entered for the appropriate examination by the due date as given in the current Examination Regulation guidance (normally in early December preceding the examinations). Entry is generally arranged through college offices, which will return entry forms on behalf of candidates to the University Offices. Students should be sure that they have correctly entered their various options (particularly where these have been specially devised), and should consult college offices if in doubt.

Also refer to the Oxford Students website for alternative examination arrangements.

Examinations for the M.St. and M.Sc. in Archaeological Science take place in the second week of Trinity Term, but the results are not available until after the report or dissertation has been assessed; any viva will also be held at this final stage. The examinations for the Master’s degrees in Classical Archaeology and in Archaeology are in the ninth week of Trinity Term with the written papers early in the week and any oral examination at its end. Results are usually available early in the following week.

The examinations are usually held in the Examination Schools and academic ‘subfusc’ must be worn. Please note that these dates may be subject to change. For further information on the examination timetables please see http://www.ox.ac.uk/students/exams/timetables/

The written papers for Archaeological Science last two hours; those for Classical Archaeology and Archaeology last three hours. Written exams usually require three or four essays to be chosen from a selection of at least three times as many questions. Some papers may require comment on photographs or on actual objects, and some may be divided so as to require answers on different parts of the subject. The nature and layout of the papers of traditional style is best understood by looking at previous examination papers on the same subjects; past papers since 2000 can be found on OXAM (Oxford Examination Papers Online). Where there are no past papers (e.g. for a specially devised option), papers on similar subjects will provide a good guide, and discussion with your supervisor will also be helpful.

Pre-set essays and dissertation, thesis or report must be submitted to the Clerk of the Examination Schools by noon on the day specified (see Table 2). On arriving at the Examination School, you should leave yourself enough time to complete the required paperwork. Since pre-set essays, dissertations, theses and reports constitute part of your degree examination, the submission dates must be strictly adhered to. If punctual submission
is impossible, you should apply to the Proctors, through your College, for permission to submit late. There is a late-submission fee (currently £40 per submission), and, depending on the circumstances, there may also be a significant reduction in the mark awarded (see Essential Information for Students issued by the University to each student). Computer problems – up to and including total hard-drive failure – as a rule do not constitute an acceptable reason for late submission in the view of the Proctors.

Information on (a) the standards of conduct expected in examinations and (b) what to do if you would like examiners to be aware of any factors that may have affected your performance before or during an examination (such as illness, accident or bereavement) are available on the Oxford Students website.

Examination conventions
The standard required for a pass in any of the Master’s degree examinations is roughly that of an Upper Second Class Honours degree, but with greater maturity. Poorer performance in one paper may be balanced by better performance in another, but any thesis must itself reach the required standard. A Distinction (roughly equivalent to the standard of a First Class Honours degree, but with greater maturity) may be awarded for the M.St. and M.Phil., but not for the M.Phil. Qualifying Exam (good work in which counts towards a Distinction in the M.Phil. as a whole). An M.Phil. candidate whose performance in the second year examination does not merit the M.Phil. will be offered an M.St. degree, on the basis of the first year’s work. A candidate who fails the M.Phil. or M.St. examination may be permitted to take it again, but not more than once.

The Examination Conventions will be available on the School of Archaeology website.

14. School of Archaeology Prizes

The School of Archaeology gives an annual prize to the Masters' student achieving the highest mark in each of Archaeology, Classical Archaeology and Archaeological Science. If there is a tie, the prize goes to whichever of the students has the highest overall average for their degree.

15. Sponsored paid summer internships with Oxford Archaeology.

The School of Archaeology, together with Oxford Archaeology, offers a small number (normally 1-2) of summer internships of 4 to 6 weeks, for students who successfully complete the M.St. degree in Archaeological Science, Archaeology, or Classical Archaeology, or for M.Phil. candidates in Archaeology or Classical Archaeology at the end of their first year.
Students on the MSc in Archaeological Science will be working on their dissertations during this time, and thus may not apply for the internship. These provide an opportunity for students to gain experience working for Oxford Archaeology, the UK’s largest independent archaeological practice. The internships, which will be based in Oxford and are each supported by a £1000 bursary, will involve carrying out post-excavation assessment and analysis to a professional standard, for which interns will receive training and supervision. Candidates are selected on the basis of their academic performance and aptitude, although preference is given to M.Phil. candidates and those staying on to do a D.Phil. in the School of Archaeology.

16. Illness or unexpected impediments

Should you become unwell, and are likely to miss a tutorial, email the person you are scheduled to meet with. If you become seriously ill, or another unexpected impediment arises to the point where you believe you may not be well enough or able to produce assessed work or attend an exam, it is very important that you contact both your supervisor and your college as soon as possible. In case of a long-term illness or other problem, suspension of status, not necessarily for a whole year, may be possible, even in some cases retrospectively. For more information about Student Health in general, see the University’s dedicated webpage.

Examiners must be made aware through the candidate’s college of any illness that occurs shortly before, or during, the examinations, so that they can take it into account. A student unable through illness to sit the examinations at all may be able to sit them at a later date.

17. Admission to a research degree in archaeology after completing a Master’s degree

Students wishing to apply for PRS or D.Phil. status after completing an M.St., M.Sc. or M.Phil. may apply using the standard re-admission form via Student Self Service. Please see http://www.ox.ac.uk/admissions/graduate/applying-to-oxford/continuing-oxford-graduates for further information. Applications will be considered alongside those of external candidates using the same application deadlines.

The application deadlines used by Archaeology are November, late January and March. See http://www.ox.ac.uk/admissions/graduate/applying-to-oxford/application-guide for the exact deadline dates. Please note that students wishing to be considered for UK Research Council
Awards (AHRC and NERC), Clarendon Awards, and most other sources of funding, must apply at the latest by the January deadline.

Your thesis or dissertation topic should be chosen with transfer to a research degree in mind, and discussion of a suitable research proposal should begin in the first term at Oxford. All students who are accepted for the D.Phil. after completing an M.St., M.Sc. or M.Phil. will be registered as Probationary Research Students (PRS) and will be required to undertake Transfer of Status and Confirmation of Status (these are assessments of your research undertaken by two academics other than your supervisor, and which serve to provide a clear indication of the direction your work is taking).

Transferring students should note that the fees and residence requirements for a completed M.Phil. course may be offset against the corresponding requirements for the D.Phil.

In satisfactory cases, the GSC will offer conditional admission to PRS status. After the M.St./M.Sc./M.Phil. exams the GSC will make a final decision on the basis of satisfactory performance in the exams, and, in cases of doubt, on a review of supervisors’ and assessors’ reports. Candidates will be expected to achieve at least a mark of 65 and to show promise of becoming successful research students.

18. Problems and Complaints

General problems or complaints should normally be discussed first with your supervisor. If the matter concerns your supervisor, consult your College Adviser or the Director of Graduate Studies (or the Deputy Director, if the Director is involved). More formal complaints about matters of supervision, administration, transfer assessment, etc. should normally be made in the first instance to the Director (or Deputy Director) of Graduate Studies. Appeals against the DGS’s decisions will be dealt with by a sub-committee of the Graduate Studies Committee consisting of non-interested parties (normally chaired by the Deputy DGS).

If you are dissatisfied with the outcome, then you may take your concern further by making a formal complaint to the University Proctors. A complaint may cover aspects of teaching and learning (e.g. teaching facilities, supervision arrangements, etc.), and non-academic issues (e.g. support services, library services, university accommodation, university clubs and societies, etc.). A complaint to the Proctors should be made only if attempts at informal resolution have been unsuccessful.

If your concern or complaint relates to teaching or other provision made by your college, then you should raise it either with your tutor or with one of the college officers, Senior Tutor, Tutor
for Graduates (as appropriate). Your college will also be able to explain how to take your complaint further if you are dissatisfied with the outcome of its consideration.

Complaints and appeals relating to any university examination are dealt with by the Proctors. The procedure to be followed is set out in Annexe C. It should be noted that the procedure, which is only very rarely used, applies solely to complaints about irregularities in the conduct of examinations, and is not in itself a means of challenging an unfavourable outcome.

19. Supervisors and Supervision

Supervisors are appointed by the GSC, which will always try to appoint a supervisor whose research and teaching interests are in the appropriate field. The Committee will, of course, welcome (and encourages) prior consultation between graduates and prospective supervisors. In selecting a supervisor the Committee will normally ensure that they is an appropriately qualified member of the established academic staff of the University (a postholder). Shared supervision between two members of the School of Archaeology, or between one such member and a member of another Faculty or Department can be arranged where appropriate. In rare instances it may be appropriate for supervision to be provided by someone who does not hold an established post within the University of Oxford, for example where specialist input is required from an individual employed at another academic institution. In such cases someone holding an established post within the University of Oxford will be appointed by the GSC to act as a co-supervisor.

Changes of supervision are normally made where a student needs more specialised care in a particular area of the research, or when a supervisor may be temporarily away from Oxford, and in other such circumstances. Transfers may also be made in cases where difficulties in personal relations prevent productive supervision, and graduates should make any such problem known to the Director of Graduate Studies or to their College adviser, if they find themselves in this situation. If, following discussions with one or both these individuals, it is decided that a change of supervisor is necessary, then the Director of Graduate Studies (or the Deputy Director if the matter concerns the Director) will follow the matter up. Graduates should bear in mind that in formalising the change, the Office will need to determine that neither the current nor the prospective supervisor has any major objections to the proposed new arrangement.

Frequency of supervision varies, depending on, among other things, the progress of a graduate’s work and the stage it has reached. At the beginning and end of every term is a reasonable minimum. In areas well served by seminars and similar activities, supervisors and graduate students will of course meet more frequently and informally than in areas not so
served, but in all cases a student should always feel able to make an appointment to discuss any problem that arises. Since many of the applications submitted to the GSC require the formal support of supervisors, and since references may be required from them at unpredictable times, it is imperative that students keep in regular contact with their supervisors whilst in residence, and when working away from Oxford keep them fully informed on the progress of their work, and of where they can be reached.

However, particularly in the case of the one-year taught degrees, you may find that your supervisor is not actually involved in your teaching, due to the options you have selected. In such cases, the role of your supervisor is more pastoral in nature – that is to say, they should meet with you to make sure that all is well with you and that you are progressing well with your work (much as your College adviser will). In such instances the role of the Course Convenors (those teaching the options you selected) becomes much more immediate, and it is the Convenor that you should be in regular contact with, especially a the very beginning of your degree.

The supervisor reports to the University termly on the progress of a graduate’s work: this report is viewed by the Director of Graduate Studies and the college of the graduate. This takes place electronically (see Annexe B for more detailed notes on the Graduate Supervision System). Graduates will be alerted by email to the opening of the reporting cycle each term, and are expected to submit reports of their own progress, their training needs and any training undertaken before the supervisor reports are completed.

All graduates are also invited to submit annually a report of their own on their progress and any problems they have met. These ‘self-assessment’ reports go to the President of the GAO who will collate them, identify issues of general relevance and raise them at the next meeting of the GSC. Any comments or suggestions of general relevance will be discussed by the GSC, and (where appropriate) will be followed up by the GSC and the School of Archaeology. If students have specific concerns they would rather raise directly with the Director of Graduate Studies they should do so.

Supervisors are consulted by the GSC on the choice of assessors and examiners, but cannot themselves serve as assessors or examiners for those they supervise. In general, the most serious problem facing graduate students is likely to be that of the relative isolation in which they often work, combined with the long-term nature of their projects. Students can do much themselves to counter this isolation by attending (as indeed is expected) the seminars and classes provided, as well as special lecture series, without a narrow insistence on what is directly ‘relevant’ to their course of study but with a genuine desire to extend their range and general knowledge of their chosen field. At these events students can mingle with others,
including senior academic staff; discussion with both other graduates and established senior scholars is essential if the most is to be made of the chosen subjects being studied.

20. Theses and their Presentation

a. Word limits

The Examination Regulations specify for the M.Phil. a limit of 25,000 words. These are maximum limits, and shorter theses are acceptable if they cover the necessary ground. The word limits include footnotes and appendices, but exclude bibliography and descriptive catalogue or similar factual material. Extensions to the word limit are not allowed and there is no option to apply for one. It is therefore important, especially in the later stages, to know how many words you have actually written. It is surprising how often theses estimated, or announced, as ‘just under 25,000 words’ turn out to contain 40,000 words or more. The consequent last-minute adjustments are not always easy to make, and can provide avoidable anxiety to student and to supervisor. Examiners can refuse to examine a thesis of excessive length, and may require it to be shortened.

b. Choice of M.Phil. thesis subject and title

The choice of a thesis subject and title is normally the result of a continued process of discussion and amendment in which students and supervisors play a joint role. Relatively few titles are directly ‘assigned’ by supervisors, who will usually prefer to make suggestions in the light of a research student's interests, temperament and style of work, as these become clearer. The title should emerge by progressive definition over the period of probationer research student status, and be put forward in time for the GSC to give it proper consideration. The title should define the subject of a thesis clearly, positively and without pretension, indicating its limits where necessary and should not be expressed vaguely or in any way likely to mislead examiners as to the actual contents of the thesis. An acceptable title will usually indicate both the material used and the problem studied (e.g. ‘Late Bronze Age ornament types in Britain and Scandinavia: their significance for trade’). It should not be too narrow (e.g. ‘Analysis of lead-glazed ceramics from the Littlemore Kiln site’), or too broad (‘Greek Bronzes’), or mix incongruous categories of evidence (‘Tripolitanian burial practices in the reign of Trajan’). The list of graduate students issued yearly by the School of Archaeology will offer examples of titles previously approved by the GSC. The Bulletin of the Institute of
Classical Studies in London publishes annual lists of all classical theses currently being written in the UK, and other lists appear from time to time.

If it becomes clear that an accepted title does not accurately indicate the nature of a subject as it develops, it is a simple matter to ask the GSC (giving reasons) to agree to a change, but that is not an excuse for deliberate vagueness at the outset. Any application to change a title must have the approval of the applicant's supervisor, and should be made on form GSO.6.

In choosing a thesis subject it is important to bear in mind the requirement that it should be finished in time for submission Friday 6th Week of Trinity Term in your second year, and you should consider how the scope of the subject could be adjusted (e.g. in time or space), if it turns out to be larger than expected. **Extensions of time cannot be granted.** It is good advice to make a complete outline plan for a these from the start, regardless of how provisional the design has to be. The longer term project should be broken down into attainable sections and students should always know why they are reading or writing what they are (which is by no means intended to exclude the exploratory instinct or simple curiosity from a graduate student’s motivation).

Prior publication by the student of material arising from the research is fully acceptable, but the acceptance of such material for publication does not in itself constitute proof that the thesis will merit the award of the degree; that remains a judgement of the School of Archaeology, in the light of the recommendation of the examiners.

c. Presentation

A thesis normally consists of a Preface (including any Acknowledgements), followed by a Table of Contents listing with page numbers the titles of all chapters and their sub-divisions, lists of figures, plates and/or tables, and a list of abbreviations if necessary, followed by the main text. The thesis should be divided into chapters, each with a clear descriptive title. It is useful to add a brief Conclusion indicating the general results, and possible future implications of the research; and there should be a well organised Bibliography at the end. Practical guidance on these matters will be provided by supervisors, and graduates are recommended also to learn from the methods of presentation employed in reputable scholarly publications, such as Oxford Monographs in Classical Archaeology and Oxford University School of Archaeology (OUSA) Monographs. More particular guidance on the presentation of written work is provided below. It is better to aim at a plain and simple format, without all the elaborations of a professionally printed book, especially since the latter, to be successful, take up inordinate time.
A computer disc may be included as a supplement to a thesis, but may not normally be a substantive part of it. This is partly because examiners will not necessarily read the thesis beside a computer, but more importantly because a successful thesis is supposed to remain permanently consultable in the Bodleian. Past experience suggests that neither the hardware nor the software of today is likely to be still available in twenty years. If the nature of your research seems likely to require a computer disc as an essential part of the thesis, you should discuss this with your supervisor well ahead of submission, since special permission will have to be obtained from a central university body.

It is incumbent upon graduate students to ensure that their submitted work meets the standards of proper English. Examiners cannot be expected to act as copy-editors and proofreaders; and thesis examiners are at liberty to mark a thesis partially on grounds of inadequate presentation. Candidates who are not native speakers are encouraged to ask a native speaker for assistance (with the English style, but not the content) if required.

Arguments should be coherently structured, and presented in clear prose. Spelling should be accurate, grammar correct, and punctuation careful and consistent. There is no excuse for omitting diacritics in non-English words. Graduate students are expected to use word-processors in the preparation of their essays, dissertations and theses. In doing so, they must ensure that the standard of printing in the final version is good enough to be easily legible in photocopied versions, and they must guard against the often spectacular mishaps that can occur (such as entire pages printed in diminutive letters or a different font) when the simple techniques that are involved are not fully mastered. Careful checking through of text and tables is still required.

Remember that a spell-check program will not call attention to words which, while incorrectly spelt or mis-typed, are still actual words: ‘then’ without the final letter is still a word, ‘the’, and ‘this’ without the first letter is ‘his’. Make sure also that by moving text you have not breached logical structure (e.g. by ‘see below’ referring to something which now appears above, or by referring to a figure or table that is no longer in the chapter). Be careful to remove incomplete sentences and alternative versions.

It is impossible to emphasise too strongly the importance, when working with computers, of saving work frequently and of making copies. It is extraordinarily easy to lose a lot of work by a careless or casual stroke of a key, and it is a matter of basic insurance always to have a current backup copy of any work that is in progress.

**Referencing**

References should use a clear and consistent format that suits the writer and the subject, such as the ‘Oxford system’ or the more compact and direct (but less informative) Harvard system.
(author and date). Systems of reference are for use, not ostentation, and the writer of a piece of academic work should aim for what is convenient to the writer, consistent, and clear to the reader. For the Harvard system a bibliography listing all references cited in the text in alphabetical order of authors must be provided, but for the Oxford system a subject bibliography, subdivided where appropriate, may be more useful than a single unclassified list.

The ‘Oxford system’ involves providing all the bibliographic details in a footnote the first time a reference is cited; subsequent citations use an abbreviated form of the reference, also in footnotes. The terms ‘op. cit.’ and ‘ibid.’ should be used only when it is absolutely clear from the immediate context which source is being indicated, without the reader being required to hunt back for several pages in order to find out. If using the ‘Oxford system’, you should give for articles: author (with initials), title of article, abbreviated title of periodical, volume and year (where appropriate), and for books: author or editor (with initials), title, place and date of publication. Article titles are normally given in inverted commas, and book and periodical titles in italics.

Abbreviations may conveniently follow those in any suitable and well-known periodical, and should be chosen and used consistently from the first. They will often be supplemented by abbreviations for much-cited works, and a running list of these should be maintained. All abbreviations used must be explained in a List of Abbreviations. A full account of the more traditional conventions is given in New Hart’s rules: adapted from The Oxford guide to style by R.M. Ritter, Rosemary Roberts, (Oxford University Press 2005), but any well-edited book in a relevant subject will give guidance.

The ‘Harvard system’ gives the author and date, and where relevant, page numbers, in parentheses in the main text, keyed to a list of references at the end of the work that includes all works cited in the text. One can simplify this further by placing that information in footnotes rather than in parentheses in the main text; this avoids cluttering up the text with parenthetical references which disturb the flow of reading like ‘speed bumps in the prose’.

Moreover, since this is a more concise referencing system than the Oxford system, it saves on words, which can be important if you are to keep within set word limits. Again, a list of all references cited must be provided, as with the ‘Harvard system’. In the footnote, cite references by author and date. Put a space (not a comma) between the author’s surname and the date; and put a comma (not a semi-colon) between the year and the page numbers. Doing this means you are less likely to get confused with other punctuation when sometimes references in footnotes become parts of larger sentences.

If you cite multiple references in the same note, order them either alphabetically, or, better, chronologically (this helps to show the development of the literature on the topic cited).
Separate multiple references in the same note with semi-colons (this is why you don’t put a semi-colon between the year and the page numbers).

E.g.: Smith 1995, 45; Jones 1996, 147; 1998, 93.

Footnotes, whether these are preferred to the Harvard system of reference or used in addition to it, should be kept under control, and designed so as to give essential support to the text but not to pursue discussions that would be better integrated with it; nor should they be exploited in order to permit the inclusion of irrelevant digressions (it will be appreciated that published work does not always set the best example in this respect). Remember that footnotes count within the word limit for pre-set essays, dissertations, and M.Phil. theses. Clarity is more important than sheer mass of references, or the appearance of a quasi-scientific exhaustiveness. Relevant background material which is not in itself controversial need not be exhaustively documented, point by point. There is no need to cite every single work that has been consulted, so long as the important references are given and the reader gains access through these to earlier or subsidiary publications. Nor is it necessary to list well known general or reference works on every occasion on which they have been used, nor to repeat long and cumbersome titles, nor alternative paginations of articles that have been printed more than once; such cases can be listed and, where appropriate, a general acknowledgement and short title can be indicated in the bibliography or list of abbreviations and used in the notes.

Number all your footnotes throughout in a single sequence, using Arabic numerals (1, 2, 3; not i, ii, iii); don’t start again at 1 for each chapter. In English usage (and contrary to e.g. French or Italian practice), footnote markers go after punctuation, thus:

A statement that needs support;\textsuperscript{3} and another one.\textsuperscript{4}

Not:

A statement that needs support\textsuperscript{3}; and another one\textsuperscript{4}.

Put full stops at the end of footnotes.

Bibliography

Order the bibliography list alphabetically by author’s surname, and then chronologically for multiple works by the same author. Be consistent in the formatting of the bibliography. To facilitate use of the author-date system, start each entry with the author’s surname, then initials, then the year of publication in parentheses. Italicise book titles, and titles of journals (underlining originated as an instruction in a hand-written document to put something in italics, so should have no place in word-processed documents). For example:

University Press.

Illustrations should support the arguments, and so be of good quality, clear with all labels legible. They should have clear captions identifying what is shown (for an object or image, the following might be included: object, material, subject [if a representation], provenance, date, current location), and the source of each illustration should be given at the end of each caption, or in a separate list of illustrations. All illustrations, whether photographs, drawings, maps, charts etc. should be numbered in a single list of Figures.

Tables are NOT Figures: they should be numbered in their own sequence of Tables. They should have clear captions identifying what the table shows and giving the source of the data used. Tables are included within the word count of a piece of submitted work. It is not acceptable to scan a table from a separate source in an attempt to omit it from the word count.

d. Examination complaints and appeals
The University has drawn up detailed arrangements for dealing with complaints and appeals relating to any university examination, and the Proctors are the responsible officers in such cases. The University wishes to draw to the attention of graduate students the explanation of the procedure to be followed, which is set out in Annexe C. It should be noted that the procedure, which is only very rarely used, applies solely to complaints about irregularities in the conduct of examinations, and is not in itself a means of challenging an unfavourable outcome.
21. Plagiarism

These guidelines apply equally to essays, dissertations, theses, and any other work you may write throughout your graduate career. There is more advice on the University web-site at http://www.ox.ac.uk/students/academic/guidance/skills/plagiarism

(i) Plagiarism is the use of material appropriated from another source or from other sources with the intention of passing it off as one's own work. Plagiarism may take the form of unacknowledged quotation or substantial paraphrase. Sources of material include all printed and electronically available publications in English or other languages, or unpublished materials, including theses, written by others. The Proctors regard plagiarism as a serious form of cheating for which offenders can expect to receive severe penalties, possibly including disqualification from the examination process. You should be aware that there are now sophisticated electronic mechanisms for identifying plagiarised passages.

(ii) Your work will inevitably involve the use and discussion of critical material written by others with due acknowledgement and with references given. This is standard critical practice and can be clearly distinguished from appropriating without acknowledgement material produced by others and presenting it as your own, which is what constitutes plagiarism.

(iii) A thesis, dissertation or essay is essentially your view of the subject. While you will be expected to be familiar with critical views and debates in relation to the subject on which you are writing, and to discuss them as necessary, it is your particular response to the theme or question at issue that is required.

(iv) If you read primary texts that you will be discussing, it is a good idea to find your own examples of episodes, themes, arguments, etc in them that you wish to discuss. If you work from your own examples, you will be much less likely to appropriate other people’s materials.

(v) When you are taking notes from secondary sources:

   a) Always note author, title (of book or journal, and essay or article title as appropriate), place of publication (for books), and page numbers.

   b) If you copy out material word for word from secondary sources, make sure that you identify it as quotation (by putting inverted commas round it) in your notes. This will ensure that you recognise it as such when you are reading it through in preparing your thesis.

   c) At the same time always note down page numbers of quoted material. This will make it easier for you to check back if you are in doubt about any aspect of a reference. It will also be a necessary part of citation (see (vi) below).
(vi) When you are writing, make sure that you identify material quoted from critics or ideas and arguments that are particularly influenced by them. There are various ways of doing this, in your text and in footnotes: see under ‘Theses and their presentation’. If you are substantially indebted to a particular critic's arguments in the formulation of your materials, it may not be enough to cite their work once in a footnote at the start or the end of the essay. Make clear, if necessary in the body of your text, the extent of your dependence on these arguments in the generation of your own – and, ideally, how your views develop or diverge from this influence.

(vii) Example:

This is a passage from P. Zanker, *The Power of Images in the Age of Augustus* (University of Michigan Press, Ann Arbor 1988), p. 210-11, discussing the sculptural programme in the Forum Augustum:

‘But the most original and suggestive aspect of the whole program was that the counterpart to this Julian family portrait gallery, to the right of the temple, was a row of carefully selected great men of Rome (summi viri: Historia Augusta Alexander Severus 28.6). These stood beside Romulus and the kings of Rome in the opposite colonnade. The juxtaposition of the two portrait galleries thus justified the position of the princeps’ family in the new Rome by proclaiming its unique historical importance. The reality of competition between Rome’s leading families stretching back for centuries, all the ups and downs, and the relative insignificance of the Julii from the fourth to the second centuries B.C. were all thereby utterly obscured. In this version, the Julii had always been Rome’s most important family, for this family would produce her savior. A similar interpretation was already to be found in the poetry of Virgil.’

Plagiarism:

‘Augustus’ sculptural programme in his Forum is very interesting. Along the colonnade to the left of the temple were statues of Augustus’ ancestors, the Julian family. The most important aspect was that a row of carefully selected great men (summi viri) were placed opposite the statues of the Julian family, in the colonnade to the right of the temple. Next to them were Romulus and the kings of Rome. This juxtaposition justified the position of the princeps’ family in the new order by proclaiming its unique historical importance. The line of statues of the Julian family made it look as though Augustus came from a line of important historical figures going right back to Aeneas, even though some of them had really been insignificant; they were instead equated with the great heroes of Roman history. Virgil’s poetry shows a similar view of history.’

This version adds almost nothing to the original; it mixes direct appropriation with close paraphrase. There is no acknowledgement of the source; the writer suggests that the argument and the development of it is their own.

Legitimate use of the passage:

‘The sculptural programme in the Forum Augustum played an important part in Augustus’ self-projection aimed at legitimating his rule. At one end of the Forum stood the Temple of Mars Ultor; the flanking colonnades held lines of statues and the exedrae within them contained
Notes for Guidance – Postgraduate Taught Courses Only - -2016/17

statues of Romulus and Remus to the right of the temple, and Aeneas and Ascanius/lulus to the left. Zanker points out that the juxtaposition of the ancestors of the gens Iulia on the left side and the line of Rome’s past heroes or summi viri on the right set up a historical equation for the viewer, suggesting that all of Augustus’ ancestors were themselves great men and that the gens Iulia was always the leading family of Rome.¹ But the programme does more than merely proclaim the greatness of Augustus’ ancestors within the context of a history stretching back to the mythical past; as with the Fasti triumphales and Fasti consulares, it emphasises Augustan continuity with the history of the Republic, supporting Augustus’ claim to have restored the Republic and glossing over the transition to monarchical rule. In Virgil’s Aeneid (Book VI, lines 756-853) Anchises shows Aeneas an analogous parade of the great men of Roman history, from mythical figures through the great Republican heroes up to Augustus and other members of his family. Virgil died in 19 B.C. and the Forum was not dedicated until 2 B.C.; conceivably therefore the sculptural programme could have been directly inspired by the Aeneid, but it is perhaps more likely that both the Aeneid’s procession of heroes and the Forum Augustum reflect a common ideology developed in circles close to Augustus.’¹

This version uses an acknowledged paraphrase of part of the passage in forming a wider argument, with some fresh ideas and developing the point about Virgilian poetry which Zanker made only in passing. (The footnote is sound scholarly practice, but its omission would not be a matter of plagiarism, as the source is indicated in the text.)

You may be asked to provide an electronic copy of any of your written assessed work, which may be submitted for plagiarism checking via the programme Turnitin. In such instance, the version you submit to the Chair of Examiners electronically must be identical to the version you printed out for hard-copy submission.

22. Financial Assistance

Information about graduate student funding can be found on the website at: http://www.ox.ac.uk/students/fees-funding. There is an Ask a Question facility on the website. Information may also be sought from your College Office.

a. Maintenance funding

In general, funds for maintenance are harder to obtain than grants to assist travel and research. The University’s Committee on Student Hardship considers applications arising from unexpected financial difficulty; please see http://www.ox.ac.uk/students/fees-funding/assistance/hardship and contact your college for further information. The criteria are
strict and the Committee requires applicants to have applied to other possible sources for assistance. College graduate scholarships are competed for fiercely, and are awarded on academic merit, not on need, although some colleges do also have hardship funds for their own students. The University offers a limited number of Clarendon Scholarships but these are not available to those already on course.

b. Travel and research grants
There are various trust funds in different subject areas, listed annually in the University Gazette. The terms of these are set out in the Gazette Supplement on University Scholarships, etc., which is published in October. Those most useful to archaeology students are these:

- The Meyerstein Fund, administered by the Graduate Studies Committee, makes awards for archaeological research, especially travel costs, in First Week of Hilary Term. In addition the School of Archaeology also makes research awards to graduate students in Archaeology and Archaeological Science (but not Classical Archaeology) which should be applied for at the same time. Applications should be made to the Administrator by the end of Michaelmas Term. Awards are unlikely to exceed a few hundred pounds, since there are many applicants to satisfy.

- The Barclay Head Fund, administered by the School of Archaeology, makes awards for research in ancient numismatics. The Barclay Head Prize is awarded annually by the same committee for an essay of sufficient merit in the field of ancient numismatics. Essays should be sent to the Administrator, School of Archaeology, 36 Beaumont St, by 1 March each year.

Applications for grants must normally be directly related to the work for your degree, and be accompanied by realistic estimates of the costs involved and a letter of support from your supervisor. A brief written report is normally required on completion of the project.

Most colleges offer limited grants to assist graduate students with travel (ask your Tutor for Graduates or College adviser for details). The Meyerstein Award expects applicants to have applied also to their colleges for assistance with travel costs.

23. Student representation, evaluation and feedback

GAO (Graduate Archaeology at Oxford) is a student-led organization for graduate students in Archaeology, Classical Archaeology, and Archaeological Science. The GAO elect a committee and have a representative to attend the Graduate Studies Committee (unreserved business only). For further information see www.arch.ox.ac.uk/gao.html

The department organises a termly Graduate Joint Consultative Committee which is run as an open forum and gives graduates opportunity for more direct feedback. Issues raised are
reported back to the Graduate Studies Committee. Students will also be given the opportunity to fill in a brief anonymous online survey at the end of each term, in which they may offer feedback to help improve their experience.

24. Health and Safety

There are strict guidelines and procedures for graduate fieldwork and research travel which must be adhered to. A risk assessment is required for research travel as well as for fieldwork. Students are also required to have attended to the relevant training courses before they undertake fieldwork.

(a) Graduate students taking part in excavations or field projects in connection with their research must complete a Safety in Fieldwork form (available for downloading at http://www.arch.ox.ac.uk/current-graduates-fieldwork.html). You should discuss this with your supervisor, who should sign the form before it is submitted for approval by the Head of Department. This is required by University Policy. Risk assessment is something which is widely necessary in ‘the world outside’ as a way of identifying and controlling any risks from your work, so you should learn how to do it sooner rather than later. Your supervisor or the director of the project will be able to help you with this. This requirement applies even if the fieldwork is under the aegis of another body, such as another university or learned society.

(b) Graduates undertaking travel abroad to carry out research in, for example, libraries or museums, or to attend a conference, must complete an Overseas Conference/Research Travel (non-fieldwork) form. The form should be signed by your supervisor, and then submitted to the Head of Department for approval.

In cases where travel involves a degree of risk - such as travel to areas for which the Foreign Office issues alerts - it may be necessary to complete the longer Safety in Fieldwork form and carry out a risk assessment. If you have submitted the shorter form but in the course of your travel you find the opportunity to include an additional research-related element which involves a significantly increased risk, then you should contact your supervisor to discuss the risks and the steps to be taken to manage them. If the discussion is impossible, then you should not undertake the additional element. Like the original form, the additional element will need to be approve by the Head of Department. You should also be aware that changes may affect insurance cover.

(c) Insurance. For travel or field projects in connection with your research you are also required to have insurance cover. Travel insurance for all visits for a University activity should be via the University's insurers; the service is currently free of charge. The completion, submission and approval of either safety form is a pre-condition to obtain insurance cover. For further information, please contact Claire Perriton or Ian Cartwright.

(d) You must consult the Foreign and Commonwealth Office website (www.fco.gov.uk) before travelling overseas in connection with your research (whether for fieldwork or not). If the FCO advise against travel to the country you are planning to visit, then the risk assessment must take into account the increased risk. If the Head of Department still wishes the travel to take place, then a copy of the Safety in Fieldwork form will be forwarded to the University Safety Office for final comment.
Fieldwork Safety and Training

Fieldwork

Some students will, as part of their course, find it desirable to undertake fieldwork. Fieldwork is considered as any research activity contributing to your academic studies, and approved by your department, which is carried out away from the University premises. This can be overseas or within the UK. The safety and welfare of its students is paramount to the University. This includes fieldwork and there are a number of procedures that you must follow when preparing for and carrying out fieldwork.

Preparation

Safe fieldwork is successful fieldwork. Thorough preparation can pre-empt many potential problems. When discussing your research with your supervisor please think about the safety implications of where you are going and what you are doing. Following this discussion and before your travel will be approved, you will be required to complete a travel risk assessment form. This requires you to set out the significant safety risks associated with your research, the arrangements in place to mitigate those risks and the contingency plans for if something goes wrong. There is an expectation that you will take out University travel insurance. Your department also needs accurate information on where you are, and when and how to contact you while you are away.

The travel assessment process should help to plan your fieldwork by thinking through arrangements and practicalities.

Training

Training is highly recommended as part of your preparation. Even if you are familiar with where you are going there may be risks associated with what you are doing.

- Departmental course (run annually):
  Short basic fieldwork safety awareness session covering personal safety and planning tips. Post fieldwork students are invited to attend to share their experiences. All students carrying our fieldwork are expected to attend this.

- DTC courses (run termly)
  These can be located at [http://researchtraining.socsci.ox.ac.uk/](http://researchtraining.socsci.ox.ac.uk/). Although primarily aimed and DPhil students, you may find them useful depending on the requirements of your work. Discuss with your supervisor in the first instance.

25. General Information

a. Premises

Institute of Archaeology

Situated at 36 Beaumont Street, between the Ashmolean Museum and the Sackler Library, the Institute of Archaeology currently houses the offices of many (but not all) staff in archaeology and the Administrator of the School of Archaeology. It is open to all archaeologists, both students and staff, so serves as a centre where all can meet. It provides space for most of the lectures and many of the seminars in archaeology, and also holds a
Notes for Guidance – Postgraduate Taught Courses Only - 2016/17

reading/common room, a certain amount of study space for graduate students, and other facilities (see (d) below, with more details provided during the Induction programme).

Research Laboratory for Archaeology and the History of Art

The Research Laboratory (or RLAHA), located in the same building as the School of Geography and the Environment in the main University science area off South Parks Road, is the main centre for research in archaeological science in the University. It has a small specialist library, and holds seminars during term, at which all graduate students in archaeology are welcome, and indeed strongly encouraged to attend. The staff, with their expertise in many aspects of dating and the analysis of artefacts and other remains, are very willing to discuss or advise on these issues. Access to dating and analytical facilities for M.Phil. thesis projects can sometimes be provided. Proposals should be discussed at an early stage, with the Director, Prof. C. Ramsey, in the first instance.

The School also has offices in Hayes House (George Street), accommodating the Oxford Centre for Maritime Archaeology (OCMA), the Oxford Roman Economy Project, and the Endangered Archaeology of the Middle East and North Africa project (EAMENA), as well as associated postgraduate students. Also part of the School is Palaeo-Barn, the Wellcome Trust Palaeogenomics & Bio-Archaeology Research Network.

Classics Centre and Faculty of Classics Offices

Useful to Classical Archaeologists, the Ioannou Centre for Classical and Byzantine Studies, 66 St. Giles, houses the offices of several staff in Classical Archaeology, and provides space for many lectures and seminars in Classical Archaeology and Ancient History. It also houses various classical research projects and the secretariat of the Classics faculty. It has a common room, computer areas, a large lecture theatre, and various seminar rooms.

1-2 South Parks Road

The School of Archaeology has acquired a new property (formerly the Maths and Statistics Building) and is in the process of moving in. It is planned that by Hilary Term, the new facility will house some administrative staff as well as RLAHA staff. Some lectures and practical work will take place here.

Ashmolean Museum

The Museum with its lecture room is of relevance to many areas of archaeology, with important Egyptian, classical, medieval, and Asian collections. The Cast Gallery (accessed through the Museum) is also important for the teaching of Greek and Roman Archaeology. You should make full use of the museum’s rich teaching collections and will find the curatorial staff ready
to help you in whatever way they can. Questions about access to Ashmolean collections may be addressed in the first instance to Dr Eleanor Standley.

Pitt Rivers Museum

The ethnographic and archaeological collections of the Pitt Rivers Museum (access through the University Museum in Parks Road) are of world-wide scope and international importance. Its staff offices, and also the Balfour Library, with major holdings of books, periodicals and archive material in prehistoric archaeology and anthropology, are reached from South Parks Road, opposite Rhodes House.

Griffith Institute

The Griffith Institute, housed within the Sackler Library, is a research institute primarily for the study of Egyptology, but also for Near Eastern Archaeology. It houses the offices of teaching staff in Egyptology, holds substantial Egyptological archives, and publishes the Topographical Bibliography of Ancient Egyptian Hieroglyphic Texts, Reliefs and Paintings.

b. Seminars and lectures

Graduate students are welcome to attend any lectures given for undergraduate courses, for example Archaeology and Anthropology. Lecture Lists giving times places and subjects are available on-line at http://www.arch.ox.ac.uk/lecture-list.html. The Classics lecture list is available at http://www.classics.ox.ac.uk/. The lecture lists also include any classes for graduates and lecture courses not related to a particular degree. Occasional special lectures (e.g. by visiting scholars) are advertised in the University Gazette, and these are almost always open to everybody.

All departments hold research seminars, as do many groups of researchers with common research interests. Of interest to archaeologists are the seminars in Classical Archaeology, usually held on Mondays in HT, MT and normally TT at 5.00 at the Ioannou Centre for Classical and Byzantine Studies; those of the Research Laboratory are seminars in Quaternary archaeology, Archaeobotany, and materials, to name a few. Medieval archaeology, prehistoric archaeology, Roman and Greek archaeology, Fieldwork seminars, and others, are held at the Institute of Archaeology, as are some other more occasional seminars. Details of such seminars are listed in the University Gazette, especially in the issues appearing in Week 0, Week 1 and Week 2 of Full Term, see the on-line University Gazette at http://www.ox.ac.uk/gazette/. Additional seminars, or changed details, will also appear on the Archaeology web page, and as far as possible on departmental notice boards. Although every effort is made to circulate information between departments, you may find lectures or seminars of interest on the notice boards and lecture lists of other departments. Details are also sent out weekly by e-mail.
c. Skills and research training

A wide range of information and training materials is available to help you develop your academic skills – including time management, research and library skills, referencing, revision skills and academic writing - through the Oxford Students website

d. Facilities

Basic computer facilities for word processing are provided by most Colleges. In addition there are computer rooms at the Institute of Archaeology (with CAD and GIS facilities) and the Classics Centre. A number of computers provide specialist GIS and mapping-related software, for use of which students should contact John Pouncett. In addition there are general access terminals located in the library that provide web services and access to the SOLO system. Students are also able to use laptops in dedicated work areas. E-mail is provided centrally, through Oxford University IT Services. The School website, as well as providing information to the public and prospective students, provides current students with information and resources pertaining to their course. Searchable departmental library catalogues are available on-line. The Institute also houses an Imaging Unit (AIU), which offers facilities to staff and students of the School; contact Ian Cartwright for more information.

The Research Laboratory for Archaeology and the History of Art (RLAHA) offers similar facilities to the Institute.

The University’s Language Centre at 12 Woodstock Road specialises in teaching a working knowledge of Modern Languages to those not specifically studying them. It provides classes designed to help graduate students acquire a reading knowledge of languages relevant to their research, including the improvement of English for non-native speakers. Early enrolment is advised, as some of these classes are very popular. The Centre also possesses a very wide range of learning resources, including tapes, and its facilities are available free of charge to any member of the University. More information can be found at the Language Centre website.

The University IT Services (13 Banbury Rd) provides a wide range of IT services, focusing on those that are best provided on a centralised basis (the core networks, expensive peripherals, IT training, mail and other information servers) together with general IT services for those students whose needs are not met within their department or college. Specific IT assistance within the School of Archaeology can be accessed by emailing help@arch.ox.ac.uk

Communication with supervisors and circulation of notices are predominantly based on e-mail, and all students are required to use it and encouraged to check their mail on a daily basis especially during term time.
e. Parental leave
Please see the University policy on student maternity, paternity and adoption leave at http://www.ox.ac.uk/students/shw/childcare/

f. Taking your degree

Formal ceremonies for the conferring of degrees are held in the Sheldonian Theatre 12 times each year, always on a Saturday. Information about dates and procedures can be found on the University website. In order to take your degree, you must apply through your college, which may well not present candidates at all degree ceremonies. Your application must reach the Degree Conferrals Office at the Examination Schools, High Street, not later than noon on the Friday falling 15 days before the ceremony, but it is advisable to apply much sooner, since colleges have a limited allocation of places at each degree ceremony, so you should book as far ahead as possible to avoid disappointment. However, your college should not deal with your application until written notification has been received from the Examinations Office that the award of your degree has been approved, and it is unwise to make any firm arrangements (e.g. for travel) in connection with a conferral until you have been officially informed of the outcome. Correct academic dress must be worn for the ceremony. If it is inconvenient for you to attend in person to receive your degree, you may request that it be conferred in your absence.

The doors of the Sheldonian Theatre will normally open to visitors half an hour before the commencement of the degree ceremony. Tickets are required by visitors attending the ceremonies in Trinity Term, Long Vacation and October. These are issued through college authorities. Your college will provide you with a booklet giving full details of the ceremony.

g. Miscellaneous

Problems and Advice.

Personal problems where advice is needed, whether they arise from work or some other cause, should in most cases be brought in the first instance to the attention of supervisors and/or College advisers and Tutors for Graduates, who will often be able to help or recommend where next to turn.

Every college has their own systems of support for students, please refer to your College handbook or website for more information on who to contact and what support is available through your college.
Details of the wide range of sources of support are available more widely in the University are available from the Oxford Students website, including in relation to mental and physical health and disability.

Equality and Diversity at Oxford

“The University of Oxford is committed to fostering an inclusive culture which promotes equality, values diversity and maintains a working, learning and social environment in which the rights and dignity of all its staff and students are respected.” Equality Policy (2013)

Oxford is a diverse community with staff and students from over 140 countries, all with different cultures, beliefs and backgrounds. As a member of the University you contribute towards making it an inclusive environment and we ask that you treat other members of the university community with respect, courtesy and consideration. The Equality and Diversity Unit works with all parts of the collegiate University to develop and promote an understanding of equality and diversity and ensure that this is reflected in all its processes. The Unit also supports the University in meeting the legal requirements of the Equality Act 2010, including eliminating unlawful discrimination, promoting equality of opportunity and fostering good relations between people with and without the ‘protected characteristics’ of age, disability, gender, gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion and/or belief and sexual orientation. Visit the website for further details www.admin.ox.ac.uk/eop or contact them directly for advice.

The Equality and Diversity Unit also supports a broad network of harassment advisors in departments/faculties and colleges and a central Harassment Advisory Service. For specific confidential assistance and advice within the School, please contact our Harassment Advisor Diane Baker in the first instance.

For more information on the University’s Harassment and Bullying policy and the support available for students visit www.admin.ox.ac.uk/eop/harassmentadvice

Student Welfare and Support Services

The Disability Advisory Service (DAS) can provide information, advice and guidance on the way in which a particular disability may impact on your student experience at the University and assist with organising disability-related study support. For more information visit: www.ox.ac.uk/students/shw/das

The Counselling Service is here to help you address personal or emotional problems that get in the way of having a good experience at Oxford and realising your full academic and personal potential. They offer a free and confidential service. For more information visit: www.ox.ac.uk/students/shw/counselling
A range of services led by students are available to help provide support to other students, including the peer supporter network, the OUSU Student Advice Service and Nightline. For more information visit: http://www.ox.ac.uk/students/welfare/peer The Oxford Union Student Union (OUSU) also run a student advice service with advisors to help with many problems including academic disputes, appeals, accommodation, health, disability relationships, visas and issues surrounding mental health. Please see http://ousu.org/advice/student-advice-service/

The OUSU also runs a series of campaigns to raise awareness and promote causes that matter to students. For full details, visit their webpage.

Student societies

The University of Oxford Archaeological Society has been in operation since 1893. Membership information and events can be found on the OUAS website. There is also a wide range of other student clubs and societies with which to get involved. Additionally, there is a range of faith societies, belief groups, and religious centres within Oxford University that are open to students. For more information visit the University webpage for faith societies.

Employment and the Careers Service

Graduate students are advised to give consideration in good time to their employment prospects when they leave Oxford. The Careers Service of the University, with offices at 56 Banbury Road, can help graduate students to evaluate the most appropriate career prospects, both academic and non-academic.

Undergraduate teaching

There may be limited opportunities for MPhil students in their second year and with appropriate experience to teach undergraduates reading for degrees in Archaeology & Anthropology, Classical Archaeology & Ancient History, or Classics. If you wish to teach, you should read Annexe D. Whilst the GSC is keen to encourage this activity, graduate students must not allow it to hinder progress on their degree course.

h. Policies and Regulations

The University has a wide range of policies and regulations that apply to students. These are easily accessible through the A-Z of University regulations, codes of Conduct and policies available on the Oxford Students website www.ox.ac.uk/students/academic/regulations/a-z

Paid Work Guidelines

The University has a policy on the amount of paid work that should be undertaken, please see http://www.admin.ox.ac.uk/edc/policiesandguidance/policyonpaidwork/
ANNEXE A  UK Research Council and Clarendon Awards

UK Research Council Awards (AHRC and NERC) provide support for UK and EU (fees only) graduate students in Archaeology; they are not available to students from elsewhere. AHRC awards are available to students in Archaeology and Classical Archaeology, but not in Archaeological Science, which is covered by NERC. They are provided through the block grant partnership scheme and administered within the university by the Humanities Division. Information is available from the Humanities website. There is no separate application form; all eligible applicants are considered provided they meet the late January deadline. AHRC awards fall into three main categories, one of which is relevant to Taught course applicants in the School of Archaeology: The Research Preparation Master’s Scheme for students intending to proceed to doctoral study, who are undertaking a Master’s course that will prepare them for doctoral study. Continuation of the award is subject to the University reporting to the AHRC that your progress is satisfactory.

Please note that it is your responsibility to notify the AHRC about any transfer of status, suspension of status, or other changes to your circumstances which might affect the continuation or renewal of your award.

University of Oxford Clarendon Awards are open to all prospective graduates in the School of Archaeology (Archaeology, Classical Archaeology and Archaeological Science), regardless of discipline and country of origin. Awards can be made to students who are undertaking a Master’s course that will prepare them for doctoral study. Clarendon awards are provided by OUP, and administered by the divisions. There is no separate application form; all eligible applicants are considered provided they meet the late January deadline.

ANNEXE B  GSS – Graduate Supervision System

At the end of each term, your supervisor(s) will submit a report on your academic progress. To facilitate this reporting, the University operates an online Graduate Supervision System (GSS). Within this system, you are expected to contribute to your termly supervision reports by reviewing and commenting on your own academic progress, any skills training you have undertaken or may need to in the future, and on your engagement with the academic community (e.g. seminar/conference attendance or any teaching you have undertaken).

Your supervisor(s) will review and comment on your academic progress and performance during the current term and assess skills and training needs to be addressed during the next term. Your supervisor should discuss the report with you, as it will form the basis for feedback.
on your progress, for identifying areas where further work is required, for reviewing your progress against an agreed timetable, and for agreeing plans for the term ahead.

When reporting on academic progress, students on taught courses should review progress during the current term, and measure this progress against the timetable and requirements for their programme of study. All students should briefly describe which subject-specific research skills and more general personal/professional skills they have acquired or developed during the current term. You should include attendance at relevant classes that form part of your programme of study and also include courses, seminars or workshops offered or arranged by your department or the Division. Students should also reflect on the skills required to undertake the work they intend to carry out. You should mention any skills you do not already have or you may wish to strengthen through undertaking training.

If you have any complaints about the supervision you are receiving, you should raise this with your Director of Graduate Studies (DGS). You should not use the supervision reporting system as a mechanism for complaints.

Students are asked to report in weeks 6 and 7 of term. Once you have completed your sections of the online form, it will be released to your supervisor(s) for completion and will also be visible to your DGS and to your College Advisor. When the supervisor’s sections are completed, you will be able to view the report, as will your DGS and your college advisor. The DGS is responsible for ensuring that appropriate supervision takes place, and this is one of the mechanisms they use to obtain information about supervision. College advisors are a source of support and advice to students, and it is therefore important that they are informed of your progress, including concerns (expressed by you and/or your supervisor).

To access the GSS, please visit http://www.gss.ox.ac.uk/. You will be able to log on to the site using your single sign-on details. Full details of how to use the site are provided at the on-line help centre; however, should you need additional support, please contact pgt-support@arch.ox.ac.uk in the first instance.

ANNEXE C Complaints and academic appeals within the School of Archaeology

The University, the Social Sciences Division, and the School of Archaeology all hope that provision made for students at all stages of their course of study will make the need for complaints (about that provision) or appeals (against the outcomes of any form of assessment)
in frequent. Nothing in the University’s complaints procedure precludes an informal discussion with the person immediately responsible for the issue that you wish to complain about (and who may not be one of the individuals identified below). This is often the simplest way to achieve a satisfactory resolution.

Many sources of advice are available within colleges, within faculties/departments and from bodies like Student Advice Service provided by OUSU or the Counselling Service, which have extensive experience in advising students. You may wish to take advice from one of these sources before pursuing your complaint. General areas of concern about provision affecting students as a whole should be raised through Joint Consultative Committees or via student representation on the School of Archaeology’s committees.

Complaints

If your concern or complaint relates to teaching or other provision made by the School of Archaeology, then you should raise it with the relevant course co-ordinator or programme director if appropriate, or with the Director of Graduate Studies Prof Irene Lemos or Deputy Director of Graduate Studies Dr Michael Charles. Within the department the officer concerned will attempt to resolve your concern/complaint informally. If you are dissatisfied with the outcome, then you may take your concern further by making a formal complaint to the University Proctors. The procedures adopted by the Proctors for the consideration of complaints and appeals are described on the Proctors’ webpage, the Student Handbook, and the relevant Council regulations.

If your concern or complaint relates to teaching or other provision made by your college, you should raise it either with your tutor or with one of the college officers, Senior Tutor, Tutor for Graduates (as appropriate). Your college will also be able to explain how to take your complaint further if you are dissatisfied with the outcome of its consideration.

Academic appeals

An academic appeal is defined as a formal questioning of a decision on an academic matter made by the responsible academic body.

For taught graduate courses, a concern which might lead to an appeal should be raised with your college authorities and the individual responsible for overseeing your work. It must not be raised directly with examiners or assessors. If it is not possible to clear up your concern in this way, you may put your concern in writing and submit it to the Proctors via the Senior Tutor of your college.

Please remember in connection with all the academic appeals that:
Notes for Guidance – Postgraduate Taught Courses Only - -2016/17

• The Proctors are not empowered to challenge the academic judgement of examiners or academic bodies.

• The Proctors can consider whether the procedures for reaching an academic decision were properly followed; i.e. whether there was a significant procedural administrative error; whether there is evidence of bias or inadequate assessment; whether the examiners failed to take into account special factors affecting a candidate’s performance.

_Under no circumstance should you ever contact your examiners or assessors directly._

ANNEXE D Teaching Opportunities for Graduate students

The School of Archaeology is anxious to help graduate students to take up opportunities to gain experience in teaching through giving tutorials to undergraduates. However, the organisation of tutorial teaching is a college matter, and is paid for by the colleges to which the undergraduates being taught belong. The School has no power to assign undergraduates to particular graduate students who want to teach. It should be noted that graduate students are not normally allowed to teach other graduate students.

_You should be aware that Taught Course Graduates are unlikely to be given preference over DPhil candidates with regard to teaching; however, some second year MPhil candidates may be permitted to teach in appropriate circumstances._

Any graduate student intending to teach for the Archaeology & Anthropology or Classical Archaeology & Ancient History degrees is required to take a half-day course on tutorial teaching, organised by the School of Archaeology (usually Tuesday Week 5 of HT). Anyone planning to teach for the archaeology options in Classics is also strongly advised to attend this course. Information about this course will be sent to all archaeology graduate students. It is highly recommended that, if you have any interest in teaching, you take this course in your first year. Graduate students are also normally expected to have completed their Transfer of Status before they begin teaching. If you wish to undertake tutorial teaching you should then consult your supervisor for approval and to discuss for which undergraduate courses you would be qualified to teach, and how much teaching you could do without interfering with your thesis work.

The supervisor should write a letter saying what subjects you may teach, and for how many hours. You must not undertake teaching, or change the amounts arranged, without your supervisor’s permission. The School of Archaeology, in line with the regulations for UK
Research Council-funded graduate students, has ruled that you may not spend more than six hours a week on undergraduate teaching, this amount of time to include any preparation of teaching and marking of written work.

The next step is to make sure your name is on the appropriate register of graduate students willing to undertake teaching. For Archaeology & Anthropology, the register is kept by Dr Wendy Morrison at the Institute of Archaeology. After speaking to your supervisor, you should fill in the online registration form, which collects the necessary information, and confirms you have met the conditions required before you can be included in the register. This will be verified with the co-ordinators of the courses you requested to teach and you will be notified of the result of your requests within 2 weeks.

Particularly if you have not been an undergraduate at Oxford yourself, you should also ask your supervisor about matters of course content, where to obtain reading lists and/or past examination papers, etc. Also consult the relevant course co-ordinator (given in the syllabuses on the appropriate websites).

ANNEXE E    Marking criteria and mark schemes for all M.St. and M.Phil. examinations in Archaeology

A. General:
It is expected that all work submitted will answer the question which is set and will be presented with due attention to writing style, grammar, punctuation and spelling, and to proper citation of references and format of bibliography.

B. Pass and Distinction levels:
- Work of the standard regarded as just sufficient to pass will be assigned a mark of 50.
- Work of the standard regarded as just sufficient for Distinction will be assigned a mark of 70.

An average mark of 65 or above will normally be required for progression to Probationary Research Student (PRS) or D.Phil. status, but other evidence will also be taken into consideration in reaching a final decision on transfer applications.
C. Criteria for the award of various mark bands

**Over 79**

Outstanding work, including all the qualities listed below, but showing complete command of the subject, originality, evidence of extensive reading, and a developed understanding of the overall context of the problem or question.

**79-70**

Excellent work, with an unequivocal grasp of current major issues in the field, a depth of knowledge of the concepts and material involved. Knowledge, argument and methodology are reviewed critically, with insight and independence of thought. Arguments should show sophisticated reasoning and be clear, well focused and cogent. Thoroughness, insight, wide reading and understanding, clarity of thought and expression, critical ability and originality are all present.

**60-69**

Work shows consistency, fluency and critical ability in discussing and evaluating evidence and draws upon theories from a variety of sources, with the whole organised into a structured argument. An understanding and assimilation of the relevant literature is demonstrated, and there is a relation of concepts and ideas from different part of the teaching, showing some degree of independence of thought.

**50-59**

Work shows knowledge and understanding, but there may be little development of ideas and methodology. There are some omissions, shortcomings, or errors of fact, and limited deployment of evidence to support ideas or argument. There is reference to the literature, though not extensive, and there may be limited evidence of critical ability. Candidates must show that they have grasped the fundamental concepts and procedures in the field, and the work is adequately executed, although there may be some lack of clarity and focus.

**40-49**

Work shows a limited degree of knowledge and understanding of the essential literature for the course. Examination answers contain some relevant material but may demonstrate significant inaccuracies, be insufficiently focused on the question, or simply general and diffuse. Dissertations demonstrate some familiarity with the relevant literature, but may show significant deficiencies in organisation and discussion of ideas, while arguments may be inadequately supported or hard to follow. Practical work shows some ability but aspects of data collection and processing may be problematic.

**Under 40**

Work that shows little understanding of and/or is barely relevant to the question, shows minimal evidence of reading, contains largely erroneous or irrelevant material, and is very short and/or unfocused; may be poorly expressed and organised.

D. Penalties

Under normal circumstances the following penalties will be applied by the Examiners:

**For the late submission of work:** the subtraction of one mark per day to a maximum of 5 marks per week.
For work that is over length: Essays or dissertations will be penalised by up to 1 mark for every 2% (or part thereof) by which they exceed the specified word limit.

E. Dissertation and thesis marking
The General criteria in A. above apply equally to dissertations and theses, so the mark bands set out in C. above may be generally sufficient for M.St dissertations. But for the larger theses (M.Phil. thesis and M.Sc. dissertation) the following aspects should also be assessed:

• The delineation of the aims, assessment of methods, and appreciation of limitations, of the thesis.
• The placing into a scholarly context of the central concerns and outcomes of the thesis.
• The choices of material, of methodology and, where appropriate, of experimental approaches, and methods of data analysis.
• The competence of execution, including, where appropriate, experimental work and statistical or other analysis of the results.
• The quality of interpretation in terms of intelligence, knowledge of relevant context, originality and subtlety.
• The ability to present a large-scale project and its outcomes as a whole, and to summarise these succinctly and accurately.

In terms of marks:
over 79: exceptional
70-79: excellent
60-69: good
50-59: satisfactory
40-49: less than satisfactory
under 40: poor

ANNEXE F  Picture Questions in Classical Art and Archaeology Examinations: some guidelines

1. Introduction.

The following suggestions are intended for those tackling picture questions in exam papers that involve classical art and archaeology. Depending on the subject of your paper and on the category of item shown in any given picture question, not all of the suggestions and aspects covered below will be equally applicable. The guidelines offer ways of approach, aspects that might be discussed, and a sequence in which they might be addressed. Others are possible.
2. Not primarily an identification test.

A crucial sentence in the rubric governing all picture questions says they ‘will not necessarily be of things of which you are expected to have prior knowledge’. In other words, the pictures may show familiar things that you quickly recognise, or they may equally show things that you are unlikely to have seen before. There are so many objects that some candidates might have come across, others not, that Examiners are not thinking in terms of what should or should not be recognised. Thus, identification is not the main point of the picture question. Examiners want to see you bring wide knowledge of the subject to bear in assessing a single specific example, and to see how you can use a specific example to make telling general points.

3. Aspects, headings.

The following headings and aspects might be covered, some briefly, some more fully, as relevant.

A: TITLE. Give a brief summarising title to your answer. If you recognise the item, give its familiar name and state quickly anything else you can remember of its material, subject, date, provenance, and current location: ‘Artemision Zeus. Bronze statue, c. 470-60 BC, from Cape Artemision. Athens, National Museum’. If you don't recognize the item, give a plain descriptive title, perhaps mentioning a preliminary assessment of its broad date and likely place of manufacture, if you know them, which you might come back to in your discussion: ‘Athenian black-figure cup, 6th century BC’. ‘Marble portrait bust of bearded man, 2nd century AD’. After the title, you might need to say what kind of picture you have been set: photo, photo detail, drawing, reconstruction. Drawings of sites and buildings are of course different: state plan, restored plan, elevation, section, reconstruction.

B: OBJECT (material, scale, function). What is it? What kind of object or structure is shown? Of what material is it made? Gold earring, silver drinking cup, bronze helmet, terracotta statuette, marble temple. What was its function, what was it for? Often this is self-evident (helmet, earring) or obvious enough to be quickly stated: ‘black-figure krater for mixing wine and water’, ‘marble grave stele’, ‘amphitheatre for gladiatorial games and beast hunts’. Sometimes function requires discussion: a marble statue might be, for example, a cult, votive, or funerary figure, or a piece of Roman villa decor. Function might lead to discussion of contexts of use and to the effect of such an object in a sanctuary, cemetery, or villa.

C: SUBJECT (iconography). If the item is figured, what does it represent? Give a brief description of the subject, its iconography: pose, action, clothes, hairstyle, action, attributes of a statue; the action, participants, subject of a narrative scene. How do you recognise the figure(s), what is the action, occasion, setting represented, how is the story told? For non-figured artefacts and structures, briefly describe their form and main components: ‘a pebble
mosaic floor with alternating black and white lozenge pattern’, ‘an engaged tetrastyle Ionic
tomb facade with brightly painted red and blue pediment and akroteria’.
Learn and use the appropriate professional terminology -- for example, for pot shapes or parts
of classical buildings. This is not exclusionary jargon but a way of being accurate and concise.
In describing a temple, ‘amphiprostyle’ is shorter and clearer (once you have learned it) than
‘has columned porches on both short ends but no columns on the long sides’. If you do not
recognise the subject or the building type, you will spend longer here providing a careful
description of what you see. Remark on any interesting details - show you have really looked
at the object.

D: STYLE (with technique, date, place). How is the subject represented? How is the figure
styled, and how was the object or structure made? This can be shorter or longer, but the key
is to find good descriptive words and to find one to three parallels or comparanda between or
beside which the item in question can be placed. From this process you should make an
assessment of place and date of manufacture. Style and technique are usually among the
most time- and place-specific aspects. Do not be more precise than you can sustain from your
knowledge or than the category of object in question can sustain. Remember that not all things
can be dated or placed with equal precision. Sometimes we may say confidently ‘Corinthian
aryballos, c. 650 BC’. Other times we must be broad: ‘marble statue, probably 4th century BC’.
If unsure, give a broad specification.
Any points of interest that you know or can see in the picture that relate to technique, craft, or
manufacturing can be discussed with style. They are often closely connected to stylistic effect,
and often carry indications of date. For example, whiteground lekythoi with 'second' white
belong 480-450 BC. Roman portraits with drilled eyes belong after c. AD 130.

E: SIGNIFICANCE. If you have recognised the object or have been able quickly to diagnose
its function, subject, date, and place, you will spend most time on this aspect. You will score
higher the more you can make your points come out of observation or assessment of the
specific item in question. You might think about the object's significance in relation to one or
more of the following overlapping questions. How typical or unusual is it? How well does it fit
into a larger category? If not typical now, how unusual was it in antiquity? Remember that few
things that survive can have been unique. What was the original effect of the object compared
to the state we see it in now? What needs to be restored -- limbs, attributes, attachments,
colours, pedestal, base, explanatory inscription? What were the contexts of use -- public,
private, political, religious, in public square, sanctuary, house, andron, bedroom, grave? How
was the object used and how do the contexts of use affect our assessment of it?
What was the social level of the object, who commissioned and paid for it, with what target
audience in mind? How might the object's social level affect our assessment? For example,
temple projects could be aimed at the whole community, while private funerary monuments
might be aimed at a particular social group. What kinds of things would ancient viewers/users do or say around this object, image, or structure? What ideas, priorities, or values did it articulate for its user group? What kinds of scholarly interpretation have been proposed for this object or for the category to which it belongs? Do you agree with them, find them persuasive? What weaknesses do they have? Are other views possible, better? What do you think is the important point?

4. Sample A: item recognised

_Artemision Zeus._ Bronze statue, over life-size, c. 470-60 BC, from the sea off Cape Artemision (N. Euboea). Athens, National Museum.

The statue was probably a major votive in a sanctuary. It represents a naked and senior god, in striding pose, left arm held out, aiming, right arm bent holding a missile (now missing). The missile was either a trident (for Poseidon) or a thunderbolt (for Zeus). The best parallels in small bronzes from the late archaic and early classical periods (good example in Berlin) as well as the latest scholarship all suggest a thunderbolt and Zeus. The square head, regular features, and above all the long hairstyle wound in a plait around the head, visible in the back, indicate a senior god (rather than hero or mortal). The strong, simplified features, the hard-muscled body, and the organic pose and proportions all indicate a date in the 460s alongside the Olympia sculptures. The large eyes, now missing, were inlaid and were vital to the effect of the figure.

The statue belongs in the period after the Persian Wars, when the hard, new realistic-looking style we know as 'Severe' was created in big votive figures like this one, set up in sanctuaries of the gods often as thank offerings paid for from Persian-war booty. The figure is a powerful fifth-century-BC visualisation of a warring Hellenic divinity --imperious, all-seeing, potentially devastating. It belongs in the same environment as the Riace bronzes, the Olympia pediments, and the statuesque figures on the large pots of the Niobid Painter and his group.

5. Sample B: item not recognised

_Reconstruction drawing of terrace sanctuary._ Probably central Italian. Probably later second or first century BC.

The drawing shows a huge raised platform (c. 130 by 70 m, according to scale), terraced against a steep slope that falls away to the left (north). The terrace is supported here on tall, buttressed substructures that are cut away in the drawing to show they are made up of parallel, probably concrete vaults. The mouth of a tunnel emerges from the substructure and is shown as a road or passageway(?) running under the terrace from front to back.
The terrace is enclosed on three sides by complex triple-aisled, two-storeyed stoas or portico buildings. The drawing seems to show these stoas have three aisles at terrace or ground level, stepped back to two aisles in the upper storey -- an architectural configuration hard to parallel(?) The temple is shown as prostyle hexastyle (its architectural order is not specified in the drawing) set on a tall podium with a tall flight of steps at the front only. In front of the temple, the terrace is open and looks out over the surrounding country.

The massively engineered temple platform suggests a terrace sanctuary of the late Republic, like those at Praeneste and Terracina, built in central Italy in imitation of (and in competition with) hellenistic terraced sanctuaries such as those at Kos, Lindos, and Pergamon. The scale, concrete vaulting, strict axiality of the plan, and the prostyle design of the temple are all typical Italian-Roman features -- as also is the small theatre sunk into the front of the terrace. The money and ideas for such sanctuaries came from the new business and cultural opportunities opened by the Roman conquest of the Hellenistic east.

6. Conclusion.

Your task is to use careful description and relative comparison to make the item shown speak or look as it did for its ancient audience and users. You need to use your knowledge of the subject to create a useful context for it and so bring out its significance. Don’t guess, and equally if you know what the item is, don’t waste time pretending you don’t recognise it! Both are counterproductive. A good Type B answer will score highly even for a well-known monument: it is the quality of the answer not identification that counts. Conversely, a Type B answer that only pretends not to recognise the thing and ‘deduces’ what it is (a) will be easily spotted, and (b) will not score more highly than one that immediately says what the item is.

In short - if you do not know what it is, don’t guess -- look, describe, compare, deduce!

ANNEXE G Feedback on formative and summative assessment for taught Masters programmes

Formative assessment does not contribute to the overall outcome of your degree and has a developmental purpose designed to help you learn more effectively. Summative assessment does contribute to your degree result and is used to evaluate formally the extent to which you have succeeded in meeting the published assessment criteria for your programme of study.

Feedback on formative and summative assessment is an important element of all Oxford’s Masters programmes and may be provided informally and/or formally. Feedback on formative assessment e.g. course essays/assignments, should provide guidance on academic writing, will indicate areas of strength and weakness in relation to an assessment task, and will provide an indication of the expectations and standards towards which students should be working.
Feedback on summative assessment e.g. theses and dissertations, should provide a critical review of the work and suggestions for improvements and future development of the research topic to enable students to develop their work for doctoral study, if appropriate.

In response to students’ comments, policy about the provision of feedback on formative and summative assessment has been enhanced. In addition to informal feedback, all students on taught Masters programmes can expect to receive formal written feedback on at least one designated piece of formative assessment during their first term or very early in the second term of the course. Students will also receive formal written feedback on any dissertation or thesis of 5000 words or over, submitted in the final term of the course.

Students can expect to receive informal feedback on their progress and on their formatively assessed work. In the M.St. and M.Phil. Archaeology and Classical Archaeology you will receive written feedback from the option tutor on all the weekly work you submit during term as a formative assessment, and also have the opportunity to discuss the work orally in a tutorial or small class. In the M.Sc. and M.St. Archaeological Science feedback will also be given on some trial examination questions.

In the School of Archaeology students studying for the Masters in Archaeology and in Classical Archaeology, will receive formal written feedback from their option tutor on the drafts of their pre-set essays during Michelmas or early Hilary Term. Students will receive formal written feedback on their dissertation/thesis submitted in the final term of their course via a short report from the Examiners within two weeks of the final meeting of the relevant Examination Board.
ANNEXE H   Form for Declaration of Originality

Please amend and print out this form for submission of pre-set essays, dissertations, reports, or theses.

DECLARATION OF ORIGINALITY OF SUBMITTED WORK

I, ______________, affirm that my submitted work, ______________, is my own work (except where otherwise acknowledged in the text), and that it contains ___________ words, exclusive of maps, diagrams, statistical appendices, and bibliography. I also confirm that I have fully acknowledged by name all of those individuals and organisations that have contributed to the research for this pre-set essay/dissertation/ thesis.
